Description
Sikadur® Blade Repair Kit-30 is a high Tₕ composite resin system for wet lay-up processing. Sikadur® Blade Repair Kit-30 is manufactured in accordance with ISO 9001 / 14001, quality assurance system and with the responsible care program.

Product Benefits
- Approved by GL (Germanischer Lloyd)
- Good impregnation and non-draining properties
- High Heat Distortion Temperature (HDT)
- Fast curing
- High stiffness and strength
- Light weight packaging (MixPax)
- Premeasured quantities
- Resistant to crystallization at low temperature

Areas of Application
Sikadur® Blade Repair Kit-30 is designed for repair of damaged laminate structures of rotor blades. It is optimized for hand lay-up but can also be used for repair of patches by vacuum infusion. This product is suitable for professional experienced users only. Tests with actual substrates and conditions have to be performed to ensure adhesion and material compatibility.
Cure Mechanism
Curing of Sikadur® Blade Repair Kit-30 takes place by chemical reaction of the two components. Higher temperatures speed up the curing process and lower temperatures slow down the curing process.

Environmental Resistance
In case of expected chemical or thermal exposure, we recommend a project related testing. Consult the Technical Service Department of Sika Industry for advice.

Method of Application
Surface preparation
It is necessary to prepare the substrates prior to lamination to ensure optimal adhesion and strength. Based on the surface condition and type of material, physical or chemical pre-treatment may be required after the cleaning process. Advice on specific applications is available from the Technical Service Department of Sika Industry.

Mixing
Open packaging and remove sealing strip. Retain plastic clip and use it to move resin (A) into the section containing the hardener (B). Repeat 4 - 6 times. Squeeze packaging vigorously for 30s to properly mix the two components. Carefully cut off the corner of the packaging and pour the resin into a cup. The resin is ready for use. Apply Sikadur® Blade Repair Kit-30 within pot life.

Note: Low application temperatures influence the mixing, application and processing properties. Refer to the corresponding Application Guideline for further information or consult Technical Department of Sika Industry.

Cleaning
Uncured Sikadur® Blade Repair Kit-30 may be removed from tools and equipment with Sika® Cleaner P. Once cured, the material can only be removed mechanically. Hands and exposed skin should be washed immediately using Sika® Handclean towels or a suitable industrial hand cleaner and water. Do not use solvents!

Storage Conditions
Sikadur® Blade Repair Kit-30 has to be kept between 5°C and 35°C in a dry place. Do not expose to direct sunlight. If crystallisation of resin occurs, heat the MixPax up to 60°C for at least 60 minutes.

Further Information
The following publications are available on request:
- Safety Data Sheet
- Additional Product Information for Structural Laminate Repairs
- Instruction Sheet for Sika® MixPax

Packaging Information
MixPax
(A- and B-component) 300 g

Value Bases
All technical data stated in this Product Data Sheet are based on laboratory tests. Actual measured data may vary due to circumstances beyond our control.

Health and Safety Information
For information and advice regarding transportation, handling, storage and disposal of chemical products, users shall refer to the actual Safety Data Sheets containing physical, ecological, toxicological and other safety-related data.

Legal Notes
The information, and, in particular, the recommendations relating to the application and end-use of Sika products, are given in good faith based on Sika's current knowledge and experience of the products when properly stored, handled and applied under normal conditions in accordance with Sika's recommendations. In practice, the differences in materials, substrates and actual site conditions are such that no warranty in respect of merchantability or of fitness for a particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written recommendations, or from any other advice offered. The user of the product must test the product's suitability for the intended application and purpose. Sika reserves the right to change the properties of its products. The proprietary rights of third parties must be observed. All orders are accepted subject to our current terms of sale and delivery. Users must always refer to the most recent issue of the local Product Data Sheet for the product concerned, copies of which will be supplied on request.
