

# SIKAPLAN FIRE-RESISTANT FELTBACK MEMBRANE

In either new construction or the replacement of an existing roofing system over a combustible deck, a UL fire rated system can be costly. Asphaltic “built-up” roofing systems require multiple layers that increase overall installation time, labor costs, and system weight. Single-ply membrane systems such as TPO, EPDM, and PVC typically require a supplementary barrier such as a gypsum cover board for fire resistance, an additional step that adds cost and weight – that is, until now. Introducing Sikaplan FRF, which eliminates the need for an additional fire barrier and provides a faster and lighter-weight single-ply solution for the same installed cost as many built-up systems.

Sikaplan Fire-Resistant Feltback (FRF) is a cost-effective, lightweight, and fire code compliant option for projects over combustible decks. The Sikaplan membrane has an integral fire-resistant felt backing and can be mechanically-attached directly over a wood deck substrate.

Sikaplan FRF is factory produced by the world’s most trusted PVC manufacturer, ensuring ultimate quality control. The result is a time proven membrane which allows for a faster installation that gets your building “dried-in” quicker and the interior subcontractors to work sooner.

This can all be achieved without the use of either hot asphalt kettles and their associated fumes and hazards or an added fire barrier such as gypsum board for TPO, EPDM, and PVC systems.

Sikaplan FRF achieves a UL Class A fire rating on combustible decks while reducing system components and their associated weight, ultimately saving on labor and material costs.

- Meets UL Class A Fire Rating
- Removes Kettles of Hot-Asphalt and Associated Hazards
- Eliminates a Fire Barrier Such as Gypsum Board
- Installs in Less Time than a Built-Up System
- Gets You “Dried-In” Faster
- Reduces System Components and Weight
- Quick and Easy Mechanically-Attached System
- Available in 10-Foot Wide Rolls of 60 Mil Membrane
- Offered in EnergySmart White or Reflective Grey Colors
- Warranted Up To 20 Years
