SIKA’S NEW PRODUCTS 2019
REPAIR, PROTECTION, SEALING & BONDING
# TABLE OF CONTENTS

## SEALANTS
- SikaHyflex®-150 LM  
- Sikaflex®-2c NS Arctic  
- Sikaflex®-102 EverFlash Membrane  
- SikaHyflex®-407 Ever Flash  
- Sika® LoadFlex 524 EZ

## TRAFFIC COATINGS
- Sikalastic®-715 Textured TopCoat  
- Sikalastic®-715 Lo-VOC Textured  
- Sikalastic®-736 Textured  
- Sikalastic®-745 Textured  
- Sikalastic®-395 Textured  
- Sikalastic®-390 NP  
- Sikalastic Primer

## COATINGS / WATERPROOFING
- Sikalastic®-320 NS/SL/SG  
- Sikagard®-535  
- Sikagard®-7600 VG/HG

## MORTARS
- SikaQuick® Winter Boost  
- SikaQuick® 1000 LD (Low Dust)  
- SikaQuick® EZ Patch  
- SikaQuick® VOH LD (Low Dust)

## CORROSION / BONDING AGENTS
- Sika® Armatec® 1C  
- Sika® Armatec® 10 ZR

## SEALERS
- Sikagard® SN-40

## EPOXIES
- Sikadur®-22 Lo-Mod LT  
- Sikadur®-345
# SEALANTS

## SikaHyflex®-150 LM

**ONE PART, LOW MODULUS, HYBRID SEALANT**

**Description**
SikaHyflex-150 LM is a premium-grade, high movement, fast curing, one component, non-sag, elastomeric, hybrid sealant. Meets ASTM C-920, Type S, Grade NS, Class 50, use NT, M, A, G, O.

</tbody>
</table>

All colors available in 10.1 oz cartridges (MTO).

**Advantages**
- Fast skin time (< 60 min).
- Excellent adhesion to porous and non-porous substrates.
- Superior UV resistance and weathering.
- Color retention – white stays white.
- Can be over-painted immediately after application.
- Very low VOC < 12g/L.
- Non-staining.

## Sikaflex®-2c NS Arctic

**TWO-COMPONENT, NON-SAG, POLYURETHANE ELASTOMERIC SEALANT FOR ARCTIC WEATHER APPLICATIONS**

**Description**
Sikaflex-2c NS Arctic is a 2-component, premium-grade, polyurethane based, elastomeric sealant formulated for cold weather applications. It is principally a chemical cure in a non-sag consistency. Available in a wide range of architectural colors with convenient color paks. Meets ASTM C-920, Type M, Grade NS, Class 25, use T, NT, M, G, A, O and Federal Specification TT-S-00227E, Type II, Class A. Meets CAN/CGSB 19.24 - M90.

**Notes**

- Easy to mix, gun, tool down to 15°F.
- At extreme cold temperatures the material will continue to be workable, gunable and toolable.
- No pre-conditioning needed, even when temperatures go below 15°F.

**Packaging**
- 10.1 fl. oz. cartridge
- 20 fl. oz. sausage

**Packaging**
- 1.5 gal unit
Sikaflex®-102 EverFlash Membrane

ONE-COMPONENT, GUN-GRADE, WINDOW AND DOOR FLASHING, SEALING AND ADHERING COMPOUND

Description
This multi-purpose material is based on a special moisture-cured polyurethane that offers an accelerated curing time.

Notes

Advantages
- Excellent weathering and water resistance.
- UV Stable.
- Non-corrosive.
- Non-Staining.
- Non-Shrinking.
- Can be used for multiple situations (static cracks less than ¼", 90° details, sealing fasteners, buck embedment & flashing).
- High durability
- Excellent unprimed adhesion on all cement-based materials, brick, ceramics, glass, metals, wood, epoxy, polyester and acrylic resin.
- Can be used with direct applied stucco applications.

SikaHyflex®-407 EverFlash Universal

UNIVERSAL FLASHING AND WEATHER BARRIER SEALANT

Description
SikaHyflex®-407 EverFlash Universal is a one-component, hybrid technology, non-sag, flexible, flashing and weather barrier sealant designed for primerless adhesion to the most challenging substrates found in the building envelope such as peel & stick window and flashing membranes. Meets ASTM C920, Type S, Grade NS, Class 12.5, use NT, G, A, O, M.

Notes

Advantages
- Unprimed adhesion to challenging, low surface tension surfaces such as polyethylene, polypropylene and polyolefins.
- Compatible with bituminous and asphalt based materials – will not cause bleeding.
- Excellent long term UV and weatherability.
- Can be painted over with most acrylic coatings.

Sika® Loadflex-524 EZ

TWO COMPONENT, SEMI RIGID, POLYUREA CONTROL JOINT FILLER

Description
Sika Loadflex-524 EZ is a technologically advanced, two-component, quick-setting, semi-rigid, solvent-free, self-levelling control joint filler.

Advantages
- Quick-set formula reduces down time.
- Material can be shaved off smooth as early as 5 minutes or as late as 24 hours after placement at 73 °F
- Cures at temperatures down to -13 °F
- Hard, load-bearing filler designed to withstand industrial traffic.
- Provides even load transfer across floor joints, thereby protecting joint edges from breaking down under traffic.
- Two components, easy to use, 1:1 mix ratio.
- Improved consistency to allow easier dispensing and reduced blockage of equipment.
- Seals joints from collecting dirt, dust and debris.

TRAFFIC COATINGS

Sikalastic®-715 Textured TopCoat

SINGLE COMPONENT, INTEGRALLY TEXTURED, ELASTOMERIC, TRAFFIC BEARING WEAR AND TOP COAT

Description
Sikalastic-715 Textured TopCoat is a single component, UV-resistant, aromatic, moisture cured, elastomeric polyurethane coating intended for use as the traffic bearing wear and top coat over polyurethane waterproofing membrane for pedestrian and vehicular traffic bearing applications, and as a protective top coat over polyurethane waterproofing membrane under a separate wearing course such as concrete or asphalt pavement, and tile in a setting bed.

Advantages
- Excellent crack-bridging properties and flexibility, even at low temperatures.
- Outstanding resistance to abrasion and wear.
- Resistant to water and de-icing salts.
- Alkaline resistant.
- UV resistant.
- Range of standard colors.

Sikalastic®-715 Lo-VOC Textured

SINGLE COMPONENT, INTEGRALLY TEXTURED, ELASTOMERIC, LOW-VOC, WEAR AND TOP COAT

Description
Sikalastic-715 Lo-VOC Textured is a single component, UV-resistant, aromatic, moisture cured, low VOC elastomeric polyurethane coating intended for use as the wear and top coat over polyurethane waterproofing membrane for pedestrian and vehicular traffic bearing applications, and as a protective top coat over polyurethane waterproofing membrane under a separate wearing course such as concrete and tile in a setting bed.

Advantages
- Low VOC - California Compliant.
- Fast turnaround with optional Booster.
- Excellent crack-bridging properties and flexibility, even at low temperatures.
- Outstanding resistance to abrasion and wear.
- Resistant to water and de-icing salts.
- Alkaline resistant.
- UV resistant.
- Range of standard colors.

TRAFFIC COATINGS

Sikalastic®-736 Textured

SINGLE COMPONENT, ALIPHATIC, MOISTURE CURED, LOW VOC, ELASTOMERIC
POLYURETHANE PRETEXTURED TOP COAT

Description
Sikalastic-736 Textured is a single component, aliphatic, moisture cured, low VOC, elastomeric polyurethane coating intended for use as the traffic system top coat over polyurethane waterproofing membrane for pedestrian and vehicular traffic bearing applications. Sikalastic-736 Textured provides superior UV resistance, slip resistance, color stability and cleanability, as well as more decorative options. Optional Sikalastic 700 ACL accelerator can be used to speed cure time.

Advantages
- Low VOC - California Compliant.
- UV stable.
- Integrally textured - in pail aggregate.
- Superior color and gloss retention and cleanability.
- Outstanding resistance to abrasion and wear.
- Resistant to water and de-icing salts.
- Alkaline Resistant.
- Range of standard colors, with custom colors available.

Sikalastic®-745 Textured

TWO-COMPONENT, INTEGRALLY TEXTURED, ALIPHATIC, FAST-CURING,
SOLVENT-FREE, TRAFFIC BEARING WEAR AND TOP COAT

Description
Sikalastic-745 Textured is a two-component, aliphatic, chemically cured, elastomeric polyurethane coating intended for use as the traffic bearing wear and top coat over polyurethane waterproofing membrane for pedestrian and vehicular traffic bearing applications, and as a protective top coat over polyurethane waterproofing membrane under a separate wearing course such as concrete or asphalt pavement, and tile in a setting bed.

Advantages
- Low odor and fast turnaround.
- Excellent crack-bridging properties and flexibility, even at low temperatures.
- Resistant to water and de-icing salts.
- Alkaline resistant.
- Range of standard colors.

Sikalastic®-395 Textured

TEXTURED TRAFFIC COATING SYSTEM

Description
Sikalastic-395 Textured is a three-component, chemically cured, elastomeric aliphatic polyurethane coating intended for use as the traffic bearing wear and top coat over Sikalastic 390 polyurethane waterproofing membrane and over Sikalastic 391 polyurethane intermediate wear coat for pedestrian and vehicular traffic bearing applications.

Advantages
- Low odor and fast turnaround.
- Excellent crack-bridging properties and flexibility, even at low temperatures.
- Outstanding resistance to abrasion and wear.
- Long term UV resistance.
- Resistant to deicing salts.
- Range of standard colors.

Sikalastic®-390 NP

TWO-COMPONENT, ELASTOMERIC, CRACK-BRIDGING, PRIMERLESS, WATERPROOFING BASE COAT

Description
Sikalastic-390 NP is a two component, primerless, aromatic, chemically cured, elastomeric polyurethane coating intended for use as the waterproofing base coat under polyurethane or epoxy wearing surfaces for pedestrian and vehicular traffic bearing applications, and as the waterproofing membrane under a separate wearing course such as concrete, and tile in a setting bed. Sikalastic-390 NP can be a direct replacement for Sikalastic-390 in all applications.

Advantages
- Excellent crack-bridging properties and flexibility, even at low temperatures.
- Primer not required for typical applications.
- Alkaline resistant.
- Low odor and fast turnaround.
- Impervious to water and deicing salts.

Sikalastic® Primer

ONE-COMPONENT, HIGH SOLIDS, AROMATIC POLYURETHANE PRIMER

Description
Sikalastic Primer is cold applied, single component, low odor moisture-curing polyurethane resin. It is designed for sealing cementious substrate to reduce the incidence of outgassing.

Notes

Advantages
- Significantly reduces the likelihood of blistering and pin holing.
- Fast curing formulation.
- Single component.
- Compatible with most concrete, masonry, and stone substrates.
- Low odor.
- Lo-VOC.

Sikalastic®-320 NS / SL / SG

SINGLE COMPONENT, BITUMEN MODIFIED WATERPROOFING MEMBRANE

Description
Sikalastic-320 is a single component, liquid applied, bitumen modified, coal tar free, moisture cured polyurethane waterproofing membrane available in self-leveling (SL), sprayable (SG) and non-sag (NS) consistencies.

Advantages
- Easy Application.
- Applies on green and damp concrete.
- Alkali Resistant.
- Quick Re-coat time.
- Ability to catalyze with water.
- Faster cure rate.
- Reduce chance of pinholes from concrete out-gassing.
- Apply at any thickness horizontally.
- Solvent Free (NS and SL).
- Sprayable (SG only).

Sikagard®-535

LIQUID APPLIED ACRYLIC VAPOR PERMEABLE AIR BARRIER

Description
Sikagard 535 Liquid Applied Acrylic Vapor Permeable Air Barrier is a low VOC, single-component liquid applied, elastomeric membrane designed to provide a vapor permeable air and water barrier when applied to abovegrade wall assemblies. It is acrylic-based and cures to a tough monolithic rubber-like membrane that resists air leakage and water penetration when applied to plywood and gypsum sheathing, concrete and concrete masonry units.

Advantages
- Evaluated by the Air Barrier Association of America
- Passes ASTM E 2178
- Passes ASTM E 2357
- Passes ASTM E 331
- Non-sag (thixotropic) consistency, allowing waste-free application of sufficient quantities and assuring deep penetration.
- Low odor, low VOC.
- Seamless, elastomeric membrane for above grade wall applications.
- Easy to install, cost effective brush, roller or spray application using common spray equipment.
- UV Stable for 6 month exposure.
- Water vapor permeance allows wall assemblies to dry out.

Sikagard® 7600 HG / VG

TWO-COMPONENT POLYURETHANE, TROWEL GRADE, BITUMEN MODIFIED WATERPROOFING MEMBRANE

Description
Sikagard 7600 is a two-component, liquid applied, asphalt extended polyurethane sealer used in a waterproofing membrane system. The system is available in 2 grades:
- Sikagard 7600 HG - roller grade can be applied over horizontal and vertical surface.
- Sikagard 7600 VG - trowel grade can be used for vertical and overhead applications.

Advantages
- Economical and easy to apply system.
- Seamless system which bridges cracks and joints.
- Impervious to water and aqueous chemicals.
- Abrasion Resistant.
- UV Stable.

Color
- HG Part A: Transparent
- HG Part B: Black

Notes
SikaQuick® Winter Boost

WINTER ADDITIVE FOR SIKAQUICK RAPID HARDENING, CEMENTITIOUS REPAIR MORTARS

Description
SikaQuick Winter Boost is a pre-packaged additive for SikaQuick-2500 and SikaQuick VOH, formulated to increase the early strength development of SikaQuick mortars without affecting the initial workability.

Notes
- Non chloride based technology.

Advantages
- Easy to use.
- Allows for faster repairs in colder ambient air temperatures.
- For cold temperature applications; 20° - 45° F (-6° - 7°C).
- Non chloride based technology.

Packaging
10 lb pail
1 measuring cup included

SikaQuick®-1000 LD (Low Dust)

RAPID HARDENING REPAIR MORTAR WITH EXTENDED WORKING TIME

Description
SikaQuick-1000 LD is a low dust, one-component, rapid hardening, early strength gain, cementitious, patching mortar for concrete.

Notes
- High early strength.
- Easily applied to clean, sound substrates.

Advantages
- Specially suited for warmer weather applications when extended working time is required.
- Epoxy coatings can be applied as early as 6 hours at 73° F (23° C).
- Freeze / thaw resistant.
- Easy to use - labor-saving material.
- Not gypsum-based.
- High early strength.
- Open to foot traffic in 4 hours / open to vehicular traffic in 6 hours at 73° F (23° C).

### SikaQuick® EZ Patch

**HIGH PERFORMANCE, FAST SETTING, CEMENT BASED PATCH / SLOPING MORTAR**

**Description**
SikaQuick EZ Patch is a cementitious, one-component, fast setting material used to resurface concrete surfaces or creation of a slope or a pitch.

**Advantages**
- Easy to use, one-component.
- Variable water ratios for different uses: resurfacing/sloping.
- Interior and exterior use.
- Feather edge application.
- High compressive and flexural strengths.
- High abrasion resistance.

### SikaQuick® VOH LD (Low Dust)

**FAST SETTING, ONE COMPONENT, CEMENTITIOUS VERTICAL AND OVERHEAD REPAIR MORTAR WITH SUPERIOR HIGH BUILD PROPERTIES**

**Description**
SikaQuick VOH LD is a low dust, fast setting, one component, ready-to-use repair mortar for vertical and overhead applications using specialty cement blends.

**Advantages**
- Minimal time required between lifts.
- Fast finishing time.
- Time/labor-saving material; application up to 3" (76.2 mm) on vertical surfaces in one layer.
- Easy to use: just add water.
- High bond strength ensures excellent adhesion.
- High early and ultimate strength.
- Increased freeze/thaw durability and resistance to deicing salts.
- Suitable for exterior and interior applications.
- Overhead thickness up to 2" (50 mm).
- Fiber reinforced and polymer modified.
- Contains corrosion inhibitor.

Sika® Armatec® 1C

BONDING PRIMER AND REINFORCEMENT CORROSION PROTECTION

Description
Sika Armatec 1C is a cementitious, one-component, coating material with corrosion inhibitor, used as a bonding primer and/or for reinforcement corrosion protection.

Notes

Advantages
- Easy to mix, just add water.
- User-friendly application
- Excellent adhesion to mechanically prepared concrete and steel.
- Performs as a corrosion inhibitor
- High shear strength
- Can be used on exterior, slab-on-grade surfaces.
- Excellent bonding bridge for cement based repair mortars.
- Long application life
- Can be brushed on, or applied using a textured pattern pistol, hopper spray equipment.

Sika® Armatec® 10 ZR

ONE-COMPONENT, MIO-ZINC PRIMER FOR STEEL REINFORCEMENT

Description
Sika Armatec 10 ZR is a one-component, moisture cured primer modified with zinc, to provide protection against corrosion for reinforcing steel.

Notes

Advantages
- Single component, easy to use.
- Excellent adhesion to steel.
- High zinc content to protect reinforcing steel from corrosion.
- Higher bond strength.
- Long application life.
- Brush apply or spray apply.
- Compatible with cementitious repair mortars and concrete.
- Interior and exterior applications

Sikagard® SN-40

SILANE BASED REACTIVE WATER REPELLENT PENETRATING SEALER

Description
Sikagard SN-40 is a highly penetrating, water-repelling silane sealer. Using proven technology, the material has been formulated to provide an integral barrier against the ingress of moisture and water-borne salts into concrete and masonry.

Advantages
■ Good penetration.
■ Solvent based emulsion, good for low temperatures.
■ Economic and easy to use.
■ Reduces capillary water absorption, protection against driving rain and splashing on vertical areas.
■ Reduction of absorption of aggressive or deleterious agents dissolved in water (i.e. chlorides).
■ No change in water vapour permeability
■ Increases the resistance of concrete to freeze and thaw cycles and de-icing salts.
■ Resistant to sea water.
■ Ready to use.

Sikadur®-22 Lo-Mod LT

LOW-MODULUS, FAST-SETTING, MEDIUM VISCOSITY EPOXY RESIN BINDER FOR LOW-TEMPERATURE APPLICATIONS

Description
Sikadur 22, Lo-Mod LT is a 2-component, 100% solids, moisture-tolerant, epoxy binder capable of curing quickly at temperatures below 50F. It conforms to the current ASTM C-881* Type III, Grade 2, Class B & C and AASHTO M-235 specifications.

* Except Gel Time

Advantages
- Fast setting for quick turn around.
- Meets 3 hr/1000 psi requirement when mixed as an epoxy mortar.
- Tolerant to moisture both before and after cure.
- Convenient easy mix ratio A:B = 1:1 by volume.
- Excellent strength development.
- Leveling viscosity for easy, efficient application of a broadcast overlay.
- Tack-free in 3.5 hours at 50F.
- Can condition material at elevated temperatures for faster cure rates.

Sikadur®-345

HIGH-MODULUS, HIGH-STRENGTH PRIMER FOR USE WITH SIKAWRAP PRESATURATED SYSTEMS ON DAMP OR WET SUBSTRATES

Description
Sikadur-345 is a two-component, 100% solids, high-strength, high-modulus epoxy for use with SikaWrap systems in situations where substrate moisture content exceeds 4%.

Advantages
- Excellent adhesion to wet substrates.
- Suitable for overhead applications.
- 100% solids.
- Ships as non-hazardous by USDOT, IATA.
- Can be used in conjunction with Sikafleece 120 and SikaWrap Presaturated fabrics for underwater applications.
