

HYBRID ROOFING SYSTEM

The Hybrid Roofing System is a multi-layered, high-performance roofing solution using superior, time-proven materials. It utilizes the Sarnafil® G410 Feltback membrane with approved SBS modified bitumen products and is intended for use over both lightweight insulated concrete and metal decks.

- Offers system redundancy for critical applications
- Ideal when a durable, multi-layered roof is desired
- Provides the energy savings of a highly-reflective roof
- Tested according to ASTM E 108 Class A fire test standards
- Eligible for Sika's System Warranty up to 20 years
