SikaFilm®
Finishing Aid & Evaporation Control

<table>
<thead>
<tr>
<th>Description</th>
<th>SikaFilm® retards moisture evaporation from the concrete surface and acts as a finishing aid for concrete flatwork.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Applications</td>
<td>SikaFilm® is recommended for use in all applications where a superior finish is required on concrete flatwork. SikaFilm® protects concrete from the effects of excessive moisture loss in rapid drying conditions.</td>
</tr>
<tr>
<td>Benefits</td>
<td>■ SikaFilm® eliminates the need to add water to low slump concrete, or sprinkle water on the concrete surface to aid in finishing. ■ When applied to fresh concrete SikaFilm® is an excellent finishing aid for extra smooth and durable concrete floors. ■ Prevents plastic shrinkage cracking caused by evaporation in low humidity conditions such as heat and high winds. ■ Aids in finishing concrete that produces little or no bleed water, such as microsilica mixes or mixes with air entrainment.</td>
</tr>
<tr>
<td>How to Use</td>
<td>When diluted at a ratio of one to eight, one gallon of SikaFilm® will yield nine gallons of sprayable material. The total diluted material will cover an area of approximately 1600 - 3200 ft² (150 - 300 m²). Dosage rates outside the recommended range may be used when project conditions require special consideration. In this case please contact your local Sika® representative or Sika® technical service department at 1-800-933-7452 for further information.</td>
