PRODUCT DATA SHEET

Vapor Retarder Adhesive CA

VAPOR RETARDER ADHESIVE CA IS A COLD APPLIED POLYETHER BASED ADHESIVE

PRODUCT DESCRIPTION

Vapor Retarder Adhesive CA is a cold applied polyether based adhesive used to adhere Sika’s vapor retarders that are typically adhered with hot asphalt within Sarnafil and Sikaplan roofing systems. It is used in applications where hot asphalt is not advised and/or not permitted.

USES

Cold applied adhesive used to adhere Sika’s vapor retarders within Sarnafil and Sikaplan roofing systems.

Areas of Application

- Concrete
- Approved gypsum boards

CHARACTERISTICS / ADVANTAGES

- Cold applied adhesive alternative to hot asphalt
- Low odor
- Low VOC
PRODUCT INFORMATION

<tbody>
<tr>
<td>Coverage</td>
<td>The coverage rate is approximately 50 ft²/gal (0.8 L/m²) and may vary depending on the application technique and porosity of the surface.</td>
</tr>
<tr>
<td>Cure Time</td>
<td>Curing time at 77°F (25°C) and 50% RH*: 7 days depending on quantity applied. *Curing time will be longer at lower temperatures.</td>
</tr>
</tbody>
</table>

APPLICATION INSTRUCTIONS

SUBSTRATE PREPARATION
Surfaces should be clean, dry, free of dirt, dust, debris, oils and other contaminants.
Prime DensDeck® roof boards with Vapor Retarder Primer TA prior to the application of Vapor Retarder Adhesive CA. Priming is optional when using DensDeck Prime roof boards.

APPLICATION
Apply Vapor Retarder Adhesive CA with a 3/16” (4.8 mm) notched squeegee.

MAINTENANCE
Standard maintenance of Sarnafil® or Sikaplan® systems should include regular inspection of flashings, drains and termination sealants at least twice a year and after each storm.

AVAILABILITY/WARRANTY

Availability
From Sika Corporation – Roofing Authorized Applicators for use within Sarnafil or Sikaplan systems.

Warranty
Upon successful completion of the installed roof by the Sika Authorized Applicator, Sika Corporation will provide a warranty to the Building Owner via the Sika Authorized Applicator.

LIMITATIONS

Limitations
Precautions should be taken to prevent odors and/or vapors from entering the building/structure, including but not limited to turning off and sealing air intake vents or other means of ingress for odors and/or vapors into the building/structure during product application and cure.
- The minimum ambient and surface temperatures should be 41°F (5°C) and rising.
- When the ambient temperature is below 50°F (10°C), warm the material to a temperature of 70°F (24°C) at the time of application.
For use on low slope surfaces (<3 %, 3/8” per ft).
BASIS OF PRODUCT DATA

Results may differ based upon statistical variations depending upon mixing methods and equipment, temperature, application methods, test methods, actual site conditions and curing conditions.

OTHER RESTRICTIONS

See Legal Disclaimer.

ENVIRONMENTAL, HEALTH AND SAFETY

For further information and advice regarding transportation, handling, storage and disposal of chemical products, user should refer to the actual Safety Data Sheets containing physical, environmental, toxicological and other safety related data. User must read the current actual Safety Data Sheets before using any products. In case of an emergency, call CHEMTREC at 1-800-424-9300, International 703-527-3887.
