# SikaProof® Patch-200 B

## Self-adhesive Tape for External Jointing of the SikaProof® A Waterproofing System

### Description
SikaProof® Patch-200 B is a self-adhesive tape, consisting of a SikaProof® membrane laminated with a Butyl-adhesive that is covered with a release liner.

### Where to Use
SikaProof® Patch-200 B is used for post-sealing of joints, penetrations as well as damages outside on the membrane side of the SikaProof® A system.

### Advantages
- High watertightness
- Weathering resistant with temporary UV-stability
- High adhesion
- High durability of the Butyl-adhesive
- Easy and fast to install

### Typical Data

#### Packaging
1 roll, packed in one cardboard box

<table>
<thead>
<tr>
<th>Dimension</th>
<th>Width 200 mm, Length 20 m, Thickness 2.20 mm</th>
</tr>
</thead>
</table>

#### Coverage
Width 200 mm, Length 20 m, Thickness 2.20 mm

### Appearance:
White release liner over black adhesive on a light yellow membrane.

### Dimensions
- **Width:** 200 mm
- **Length:** 20 m
- **Thickness:** 2.20 mm

### System Information

#### System Components:
- SikaProof® ExTape-150 and SikaProof® Tape-150 A are self-adhesive tapes to adhere joints, connections and details in the SikaProof® A sheet membrane waterproofing system.
- SikaProof® A-05, membrane in rolls of widths 1.0 or 2.0 m
- SikaProof® A-08, membrane in rolls of widths 1.0 or 2.0 m
- SikaProof® A-12, membrane in rolls of widths 1.0 or 2.0 m
- SikaProof® Ex Tape-150, self-adhesive tape for external jointing, based on butylrubber, in 150 mm width
- SikaProof® Tape-150 A, self-adhesive tape for internal jointing, based on a polyacrylate-adhesive, in 150 mm width
How to Use

Surface Prep

The contact surface is the light yellow membrane side of the SikaProof® A membrane. It must be dry, clean and free of any materials that could impair the adhesion.

Application

SikaProof® Patch-200 B is a cold-applied and post-applied self-adhesive tape to seal joints, connections, penetrations and possible damages of the membrane on the outside membrane side of the SikaProof® A system. There is only a pressure roller required, to press the tapes firmly onto the membrane surface. For further more detailed information about the installation method, please refer to the SikaProof® A membrane Product Data Sheet and the Method Statement.

Limitations

SikaProof® Patch-200 B is approved to seal only the SikaProof® A system. To use SikaProof® Patch-200 B with other materials (such as any synthetics etc.) the compatibility has to be tested.

Not suitable for use in direct contact with PVC, tar, asphalt, hot bitumen, wood preservatives with substances containing oil, solvents or any other de-bonding agents.

Substrate temperature: +41°F / +95°F

Ambient air temperature: +41°F / +95°F

SikaProof® A system must only be installed by trained and approved Sika contractors. SikaProof® A Patch-200 B is not UV stabilized and can not be installed on structures permanently exposed to UV light and weathering. Do not apply the SikaProof® Patch-200 B during continuous or prolonged rainfall.

Shelf Life

SikaProof® Patch-200 B rolls have a shelf life of 18 months from date of production if stored properly in unopened undamaged original packaging, in a horizontal position, in dry conditions and at temperatures between +41°F and +86°F. The rolls must be protected from direct sunlight, rain, snow and ice, etc. Do not stack pallets of the rolls on top of each other, or under pallets of any other materials during transport or storage.
