

SIKA AT WORK

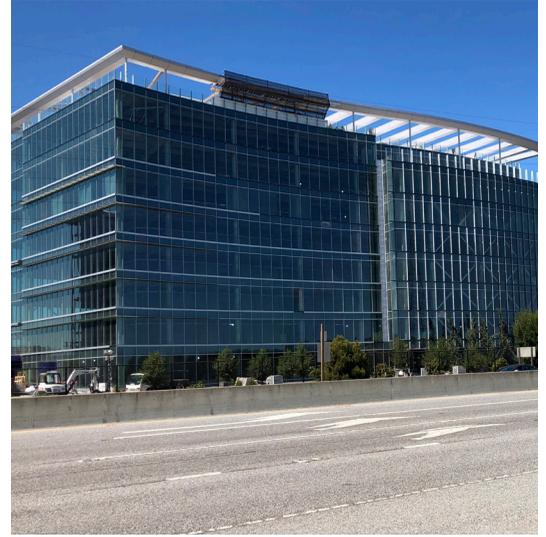

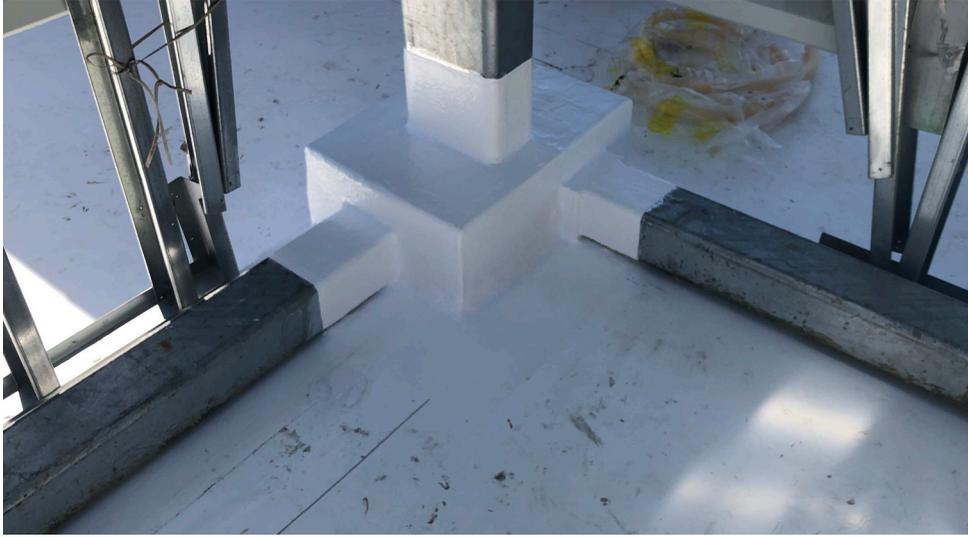

Roof Detailing – Silicon Valley, CA

- Sikalastic Roofpro 641 Lo-VOC - Single Component, No Mix, Fluid Applied Roofing and Waterproofing System

BUILDING TRUST

SIKALASTIC ROOFPRO FLUID AND DETAILING WITH SINGLE PLY ROOFING SYSTEMS

PROJECT REQUIREMENTS

New roof with 20 year performance warranty.

PROJECT DESCRIPTION

A major manufacturer of single ply roofing systems had recently all but completed a large PVC roofing installation for a confidential Silicon Valley client when there was an inquiry from the roofing contractor. The interface of concrete curbs and supports with the single ply roof system presented a detailing challenge. Enter the Sikalastic RoofPro 641 Lo VOC fluid applied roofing and waterproofing system.

Featuring a low odor, no mix, and virtually no waste system comprised of a conformable Sika Reemat fiberglass reinforcement and the Sikalastic EP Primer, Sika was able to effectively address the challenging condition and offer a fully warrantable tie in to existing single ply PVC roofing. Sikalastic-641 Lo-VOC is compatible with nearly any other existing roofing system - TPO, BUR, EPDM, HRA, to name but a few. Whether detailing or full coverage, new or existing roofs, Sikalastic RoofPro is your easily employed, globally proven solution. Contact your local Sika Representative and find out more.
