1. Apply Sikaflex - 1A around dowel. Cut a hole in the center of flashing piece smaller than dowel diameter, stretch flashing piece down dowel and hot-air weld in-place.

2. Sarnafil flashing membrane adhered to acceptable surface.

4. Sarnatherm XPS insulation.

5. Drainage composite.

6. Hot-air weld.

7. Overburden.

NOTES:
1) All flashing shall extend a min. of 8 inches above the overburden.
2) Metal counterflashing and coping stone are to be installed to meet local codes and requirements.

COPING STONE
