Description
Sika® PowerClean Aid has been specifically developed to remove contamination that cannot be sufficiently removed using standard glass cleaners only. When used in combination with foaming or liquid glass cleaner, Sika® PowerClean Aid removes contamination on a microscopic level without visibly scratching or otherwise damaging the glass surface.

Product Benefits
- Removes contamination that cannot be removed with standard cleaners
- Removes contamination without scratching surface
- Aids in removing label residue on glass parts

Areas of Application
Sika® PowerClean Aid is designed for the removal of contamination encountered on AGR ceramic frits and glass.
Method of Application

Application
Use any non-antistatic glass cleaner to wet the surface and detect contamination. Use Sika® PowerClean Aid and start scrubbing the bonding area around the perimeter of the glass. Sika® PowerClean Aid is designed for a single use on each glass part. Once the part has been treated with Sika® PowerClean Aid the part can be wiped clean with paper towels and more glass cleaner if necessary. Surfaces must be allowed to dry completely before the next step in surface preparation (e.g. application of Sika® Aktivator PRO) is performed. This product is to be used by experienced professional technicians only.

Limitations
- Compatibility with the current substrate is to be verified prior to the application.
- Before applying Sika® PowerClean Aid to sensitive surfaces (e.g. plastics, etc.) it is recommended to test Sika® PowerClean Aid on a small, possibly non-visible area of the base material.
- Before application of adhesive, the surface has to be pre-treated according to Sika’s surface preparation recommendations.
- If this product is used for other applications outside of Aftermarket Auto Glass Replacement, trials must be carried out prior to use.

NON-HAZARDOUS
Not a hazardous substance or mixture. This product does not contain any chemicals known to the State of California to cause cancer, birth, or any other reproductive defects.
