DESCRIPTION

Sikaflex®-510 AM50 is a 1-component, high movement Silane Terminated Polymer (STP) sealant that cures on exposure to atmospheric humidity.

PRODUCT BENEFITS

- Optimized for joints connecting dissimilar substrates such as vinyl or aluminum to concrete or EIFS
- Outstanding unprimed adhesion to porous and non-porous substrates
- Superior color stability and movement capability
- Paintable with water-based paints as soon as it skinned over
- Excellent UV and weathering resistance
- AAMA 808.3, Exterior Perimeter Sealing
- ASTM C-920 for Type S, Grade NS, Class 50

PACKAGING

- (24) 295 ml plastic cartridges
- (20) 600 ml unipacks

Note: As with all colored material, there may be variations in color across differing batches. Where color is critical, it is advisable to allocate batches to particular sections of the application. Revised 11.6.2020
