SikaBit® Primer AW is designed for use as a primer prior to the installation of self-adhering membranes. This thin solution readily penetrates pores and dries fast to provide a tacky, firm substrate for adhesion of the membranes. It is suitable for use over asphalt, wood, plywood, gypsum board and concrete surfaces.

USES

It is suitable for use over asphalt, wood, plywood, gypsum board, masonry and concrete surfaces.

CHARACTERISTICS / ADVANTAGES

1. Easy to apply
2. Quick drying
3. Promotes adhesion
4. Use as is, needs no intermixing
5. VOC compliant

APPLICATION INSTRUCTIONS

SUBSTRATE PREPARATION

All surfaces to be primed must be dry and free from dust, dirt, oil, grease and any other foreign matter. All surfaces must be free from frost. Surface and air temperature must be 40 °F and rising.

APPLICATION

Apply SikaBit® Primer AW by brush, roller or hand sprayer at a rate of 450–500 ft²/gal. Allow primer to dry one hour or until primer is slightly tacky. Drying time may be longer in cooler temperatures. Reprime if area is contaminated by dust or other debris, apply SikaBit® S-60 as soon as primer is dry. NEVER apply primer directly to SikaBit® membrane.

Do not apply when rain is imminent. Protect from freezing. Primer must be dried before exposure to water. Store between 50 °F and 100 °F. Keep container covered when not in use. Do not thin or dilute. Cover air intake area(s) during application and while drying.

Cure Mechanism

Product fully cures in 2 hours at 77 °F and 50 % RH.

Removal

Uncured materials may be cleaned with water. Cured material may be cleaned with mineral spirits or similar solvent. When using a solvent, strictly follow solvent manufacturer’s warnings and instructions for use.

CLEANING OF TOOLS

Uncured materials may be cleaned with water. Cured material may be cleaned with mineral spirits or similar solvent. When using a solvent, strictly follow solvent manufacturer’s warnings and instructions for use.

LIMITATIONS

Do not apply when rain is imminent. Protect from freezing. Primer must be dried before exposure to water. Store between 50 °F and 100 °F. Keep container covered when not in use. Precautions should be taken to prevent vapors and/or odors from entering the building/structure, including but not limited to turning off and sealing air intake vents and through-wall air conditioners, and other means of vapor/odor ingress during application and cure.

BASIS OF PRODUCT DATA

Results may differ based upon statistical variations depending upon mixing methods and equipment, temperature, application methods, test methods, actual site conditions and curing conditions.

OTHER RESTRICTIONS

See Legal Disclaimer.

ENVIRONMENTAL, HEALTH AND SAFETY

For further information and advice regarding transportation, handling, storage and disposal of chemical products, user should refer to the actual Safety Data Sheets containing physical, environmental, toxicological and other safety related data. User must read the current actual Safety Data Sheets before using any products. In case of an emergency, call CHEMTREC at 1-800-424-9300, International 703-527-3887.
