

# SIKA AT WORK

## Coastal Home - Grand Cayman

- Sikalastic RoofPro - Liquid Applied Roofing Membrane

BUILDING TRUST

## PROJECT FACTS

- New construction of home with flat roofs
- 7,400 square feet of 15-Year (62 mils DFT) Sikalastic®-641 RoofPro waterproof membrane on roof
- RoofPro membrane was installed in 2019

## PRODUCT SOLUTIONS

- Sikalastic®-641 Lo-VOC
- Sika® Reemat Premium
- Sika® Concrete Primer Lo-VOC
- Sikaflex®-11 FC

## PROJECT PARTICIPANTS

**ARCHITECT:** Trio

**GC / APPLICATOR:** Edgewater Development /  
Paul's Metal Roofing

## PROJECT DESCRIPTION

Beautiful high-end contemporary home, located just steps away from the Caribbean Sea. Contemporary home designs often include flat roofs which can be vulnerable to leakage due to ponding water on the roof, so selecting the waterproofing system is critical. The Architect for this home chose the liquid-applied 15 year Sikalastic RoofPro polyurethane membrane because it is seamless and fully adhered to the concrete roof deck and thereby assuring that the roof will remain watertight for the next 15+ years.
