Sikadur Combiflex® SG System

HIGH PERFORMANCE JOINT SEALING SYSTEM

DESCRIPTION
The Sikadur Combiflex® SG System is a high performance joint sealing system for expansion, contraction, and control joints. The system allows for a high degree of workability and is designed to provide a long-term seal. It is recommended for use in different types of applications and conditions.

USES
Sikadur Combiflex® SG System can be used in many different applications including:
- Filming and photography
- Construction
- Marine
- Aerospace
- Petrochemical

CHARACTERISTICS / ADVANTAGES
- No special equipment is needed for many applications
- High flexibility and high standard joint sealing ability
- Reduced shrinkage and deformation for accurate fit
- Excellent adhesion to concrete and other materials
- Easy application and cleanup
- Suitable for damp and dry construction conditions
- Uniform bonding and coverage
- High tensile strength
- Fast curing
- Low permeability
- Performance consistent over a range of temperatures
- Different grades of different materials available
- Weather resistant
- Can be used with concrete and pre-cast concrete products
