- Sikalastic 500 and 500 Flash - 1 Part Silicone Based Roof Coating System
- Sikalastic 501 - 2 Part Primer for use with asphaltic and metal surfaces as well as for over coating existing acrylic and polyurethane coatings

BUILDING TRUST

EXTENDING THE LIFE OF EXISTING ROOFS WITH A DURABLE, EASILY APPLIED AND COST EFFECTIVE ROOF COATING SOLUTION!

PROJECT REQUIREMENTS

Cost effective re-coat of existing asphaltic roofs to prolong life and protect contents within.

PROJECT DESCRIPTION

A major municipality just east of San Francisco was in the midst of reviewing the condition of roofing on a number of structures throughout the city in the summer of 2018. They eventually focused on the prospect of rehabilitating these roofs via application of a high performance roof coating system verses a complete replacement saving both time and expense.

Beginning in the fall of 2019, installation of the Sikalastic 500 silicone based roof coating began on the clubhouse roof of the local golf course. A successful result on this high valued property has since led to installations on 2 warehouse structures at the city's maintenance yard. The most recent of which was completed in November 2019.

With the availability of multiple primers to address nearly any sound substrate, a compliment of sealants and accessory items to address nearly any substrate preparation requirement and warranty programs with terms up to 20 years, Sika provides a complete solution, not just a coating. Contact your local Sika representative today and find out how we can help you enhance the safety of your facility and the life of your roof.
