### APPLICATION INSTRUCTIONS

#### APPLICATION

Sarnafil G 410 is installed after proper preparation of the approved substrate. The membrane is unrolled into Sarnacol adhesive in accordance with Sika’s technical requirements and then pressed into place with a minimum 100 lb (45 kg) steel roller. Sarnafil G 410 seams are heat-welded together by trained operators using hot-air welding equipment. Different Sarnacol adhesives require different application methods. Please consult Sika’s Specifications or Applicator Handbook for detailed installation procedures.

#### MAINTENANCE

Standard maintenance of Sarnafil systems should include inspections of flashings, drains, and termination sealants at least twice a year and after each storm.

#### AVAILABILITY/WARRANTY

**Availability**

From Sika Corporation – Roofing Authorized Applicators for use within Sarnafil or Sikaplan systems.

**Warranty**

Upon successful completion of the installed roof by the Sika Authorized Applicator, Sika Corporation will provide a warranty to the Building Owner via the Sika Authorized Applicator.
