Sika® Silbridge-400 (smooth) and Sika® Silbridge-410 (ribbed) are extruded ultra-low modulus translucent elastomeric silicone strips that are bonded to substrates using Sikasil® WS-305 AM sealant as the adhesive. These strips are specifically designed for flashing and transition applications weatherproofing against air and water infiltration.

**PRODUCT APPLICATIONS**

- Ease of installation and quality control
- Window perimeter joint seals
- Bridging between window and/or curtain wall
- Sealing air and weather barriers to adjacent curtain walls, store fronts and windows
- Capable of sealing high movement transition joints
- Resistant to ultraviolet exposure and weathering
SIKA® SILBRIDGE

APPLICATION DIRECTIONS: Consult Product Data Sheet for complete instructions and limitations.

1. Be sure surface is clean, dry and sound using recommended pretreatment.
2. Apply masking tape to both sides of the joints to be bridged for visual applications.
3. Apply min. 1/4” bead of Sikasil® WS-305 AM to each side of the joint so that 3/8” minimum of the substrate has sealant applied once the Sika® Silbridge is pressed into place.
4. Apply Sika® Silbridge within 10 minutes by pressing into sealant, followed by a roller to wet out the Sika® Silbridge and the substrate. Tool any excess adhesive at the edge of the Sika® Silbridge.
5. Remove masking tape and clean any excess sealant before it cures.
