(formerly MasterFlow<sup>®</sup> 668)

# EPOXY CHOCK GROUT FOR MOUNTING EQUIPMENT

## **PRODUCT DESCRIPTION**

SikaFlow<sup>®</sup>-668 Chock Grout is a three-component modified epoxy resin-based grout. It is used where high performance properties are required in less-accessible spaces subject to thermal shock and high vibrations. It can be placed from 1/2–3" (12.5–76 mm) thick on a base grout pour, directly to the concrete or steel to steel.

### USES

- Precision grouting of machinery
- Grouting of reciprocating gas compressors
- Grouting of steam and gas turbines
- Steel-to-steel chock grouting
- Where conventional epoxy grouts cannot be used due to limited access

## **PRODUCT INFORMATION**

#### **Chemical Base** SikaFlow®-668 Chock Grout is a three-component modified epoxy-resinbased grout. Packaging One 59.7 lb (27.5 kg) unit consists of the following: 8.33 lb (3.78 kg) can Part A (Resin) 1.37 lb (0.62 kg) bottle Part B (Hardener) 50 lb (22.68 kg) bag Part C (Aggregate) Shelf Life 2 years (for both resin and hardener) when properly stored **Storage Conditions** Store in unopened containers at 60 to 80° F (16 to 27° C) in clean, dry conditions. Density 129lb/ft<sup>3</sup> (2,064kg/m<sup>3</sup>) (ASTM C 905) Specific gravity: 2.06

Product Data Sheet SikaFlow®-668 June 2024, Version 01.01 02020200000002005

# **CHARACTERISTICS / ADVANTAGES**

- Highly flowable to conform to worn or irregular surfaces.
- Excellent physical properties at a wide temperature range.
- May be used to replace metal chocks, eliminating costly milling.
- Low creep over a wide temperature range minimizes deformation under sustained loads.

# **TECHNICAL INFORMATION**

## **BASIS OF PRODUCT DATA**

Results may differ based upon statistical variations depending upon mixing methods and equipment, temperature, application methods, test methods, actual site conditions and curing conditions.

# ENVIRONMENTAL, HEALTH AND SAFETY

For further information and advice regarding transportation, handling, storage and disposal of chemical products, user should refer to the actual Safety Data Sheets containing physical, environmental, toxicological and other safety related data. User must read the current actual Safety Data Sheets before using any products. In case of an emergency, call CHEMTREC at 1-800-424-9300, International 703-527-3887.

# **APPLICATION INSTRUCTIONS**

### NOTES ON INSTALLATION

DO NOT INSTALL THIS PRODUCT WITHOUT READING AND REFERENCING THE COMPANION SikaFlow®-668 INSTALLATION GUIDE.

- Minimum placement thickness is 1/2" (13 mm).
- Do not add solvent, water, or any other material to the grout.
- Do not alter the resin or hardener proportions.
- Contact your local representative for a pre-job conference to plan the installation.

Product Data Sheet SikaFlow®-668 June 2024, Version 01.01 02020200000002005

- Cold material will exhibit decreased flowability and decreased strength development.
- For professional use only; not for sale to or use by the general public.
- Make certain the most current versions of product data sheet and SDS are being used.
- Proper application is the responsibility of the user.
  Field visits by Sika personnel are for the purpose of making technical recommendations only and not for supervising or providing quality control on the jobsite.

### SURFACE PREPARATION

#### **GENERAL APPLICATION INSIGHTS**

- Chock size should be determined by a mechanical or structural engineer, based on anticipated stresses and grout capabilities.
- 2. Most chock grout applications involve the placement of epoxy chocks on a base grout pour. Please see the SikaFlow<sup>®</sup>-648 grout product data sheet.
- Typical epoxy chock thickness should be from 2–3" (51–76 mm).
- 4. The base grout pour should cure sufficiently before the chock grout application.

#### MIXING

- 1. Aggregate must be completely dry.
- 2. Precondition all components to 70° F (21° C) for 24 hours before using.
- 3. Pour the hardener (Part B) into a pail of grout resin (Part A) and stir by hand, using a spatula or paint stirring paddle, until well mixed to a uniform amber

**BUILDING TRUST** 

color.

- 4. Pour the mixed liquids into a horizontal shaft mortar mixer or a Kol type mixer without delay.
- 5. Add the grout aggregate, one bag at a time, and mix only until aggregate is completely wetted out to avoid air entrapment. Caution: Always add aggregate to the mixer after the premixed liquids have been poured in.
- 6. Pour the grout into a wheelbarrow or buckets for transporting to pour-site. Remove it from the wheelbarrow within 10 minutes.
- 7. After the pour is complete, clean the mixer and tools with acetone, MEK, or lacquer thinner. Exercise caution when using flammable solvents for cleaning.

## LEGAL DISCLAIMER

- KEEP CONTAINER TIGHTLY CLOSED
- KEEP OUT OF REACH OF CHILDREN
- NOT FOR INTERNAL CONSUMPTION
- FOR INDUSTRIAL USE ONLY
- FOR PROFESSIONAL USE ONLY

Prior to each use of any product of Sika Corporation, its subsidiaries or affiliates ("SIKA"), the user must always read and follow the warnings and instructions on the product's most current product label, Product Data Sheet and Safety Data Sheet which are available at usa.sika.com or by calling SIKA's Technical Service Department at 1-800-933-7452. Nothing contained in any SIKA literature or materials relieves the user of the obligation to read and follow the warnings and instructions for each SIKA product as set forth in the current product label, Product Data Sheet and Safety Data Sheet prior to use of the SIKA product.

SIKA warrants this product for one year from date of installation to be free from manufacturing defects and to meet the technical properties on the current Product Data Sheet if used as directed within the product's shelf life. User determines suitability of product for intended use and assumes all risks. User's and/or buyer's sole remedy shall be limited to the purchase price or replacement of this product exclusive of any labor costs. NO OTHER WARRANTIES EXPRESS OR IMPLIED SHALL APPLY INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. SIKA SHALL NOT BE LIABLE UNDER ANY LEGAL THEORY FOR SPECIAL OR CONSEQUENTIAL DAMAGES.
