PREFABRICATED WALL SYSTEMS

BUILDING TRUST

FAST-TRACK YOUR NEXT BUILD

IMPROVED QUALITY, REDUCED COSTS AND INSTALLATION TIME

SENERPANEL SYSTEMS COMBINE THE ADVANTAGES OF SENERGY WALL SYSTEMS WITH THE BENEFITS OF A CONTROLLED APPLICATION ENVIRONMENT. Senergy insulated wall systems have a history of success in prefabrication. SenerPanel Systems offer code compliance through third-party testing and evaluation reports and are supported with a full set of architectural details and specifications.

CONTROLLED PANEL MANUFACTURING CREATES IDEAL APPLICATION CONDITIONS FOR SENERPANEL SYSTEMS ON A SCHEDULE THAT FITS THE PROJECT TIMELINE.

Prefabricated EIFS eliminates the risk of weather-related delays during installation since the panels are manufactured off-site. The controlled application environment results in the highest quality product, reducing errors and waste.

The use of prefabricated EIFS significantly accelerates the construction process. With panels pre-manufactured to project specifications, installation is quicker, minimizing the overall project timeline and allowing for faster return to business.

Prefabricated EIFS requires less on-site labor compared to traditional onsite construction. The ease of handling and installation reduces labor costs and simplifies the building process.

The modular nature of prefabricated EIFS makes it ideal for use in tight or challenging spaces. Panels can be precisely fitted, ensuring a smooth and effective application even in restricted areas.

The lightweight design of prefabricated EIFS makes it easier to handle and install. This reduces structural load and simplifies logistics, contributing to a more efficient construction process.

Lightweight SenerPanel Wall Systems are readily hoisted into place, and provide continuous exterior insulation and secondary moisture protection.

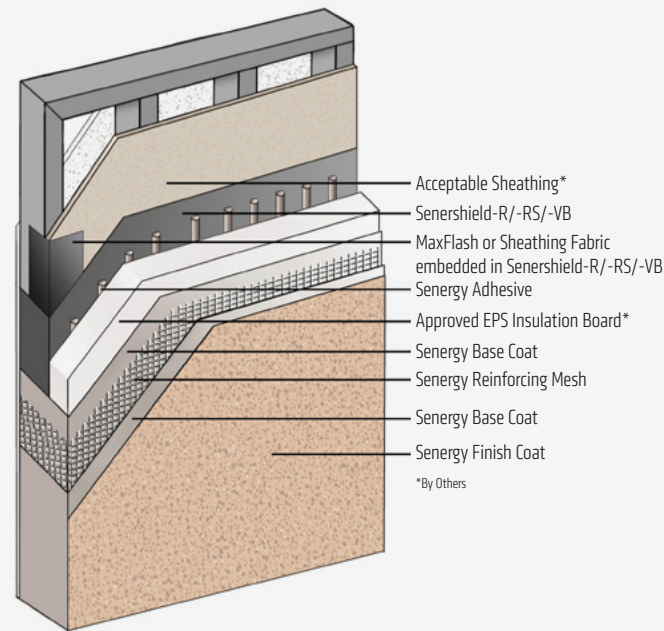

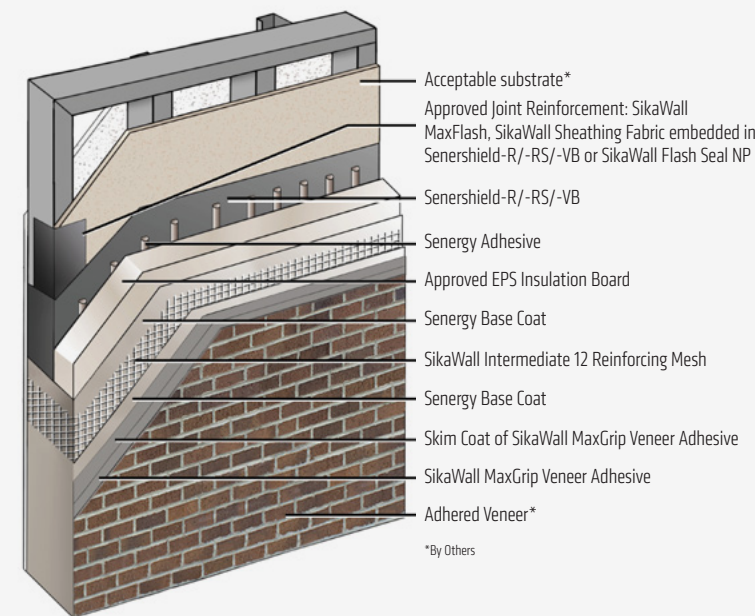

SENERPANEL SYSTEMS

Choose from Senergy's line of insulated and non-insulated wall systems to meet the design and aesthetic needs of the building.

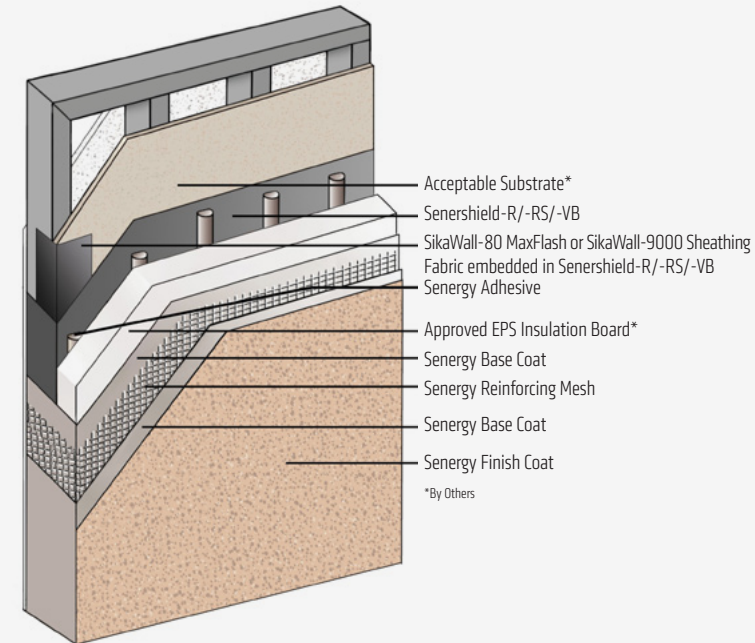

SenerPanel Channeled Adhesive CI Design

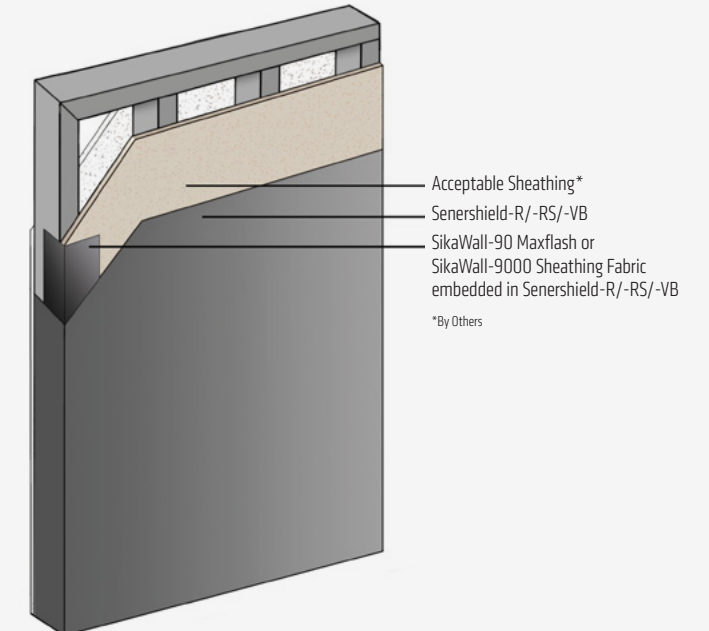

SenerPanel Channeled Adhesive CI Design with SikaWall-1000 MaxGrip Veneer Adhesive

SenerPanel Secondary Weather Barrier

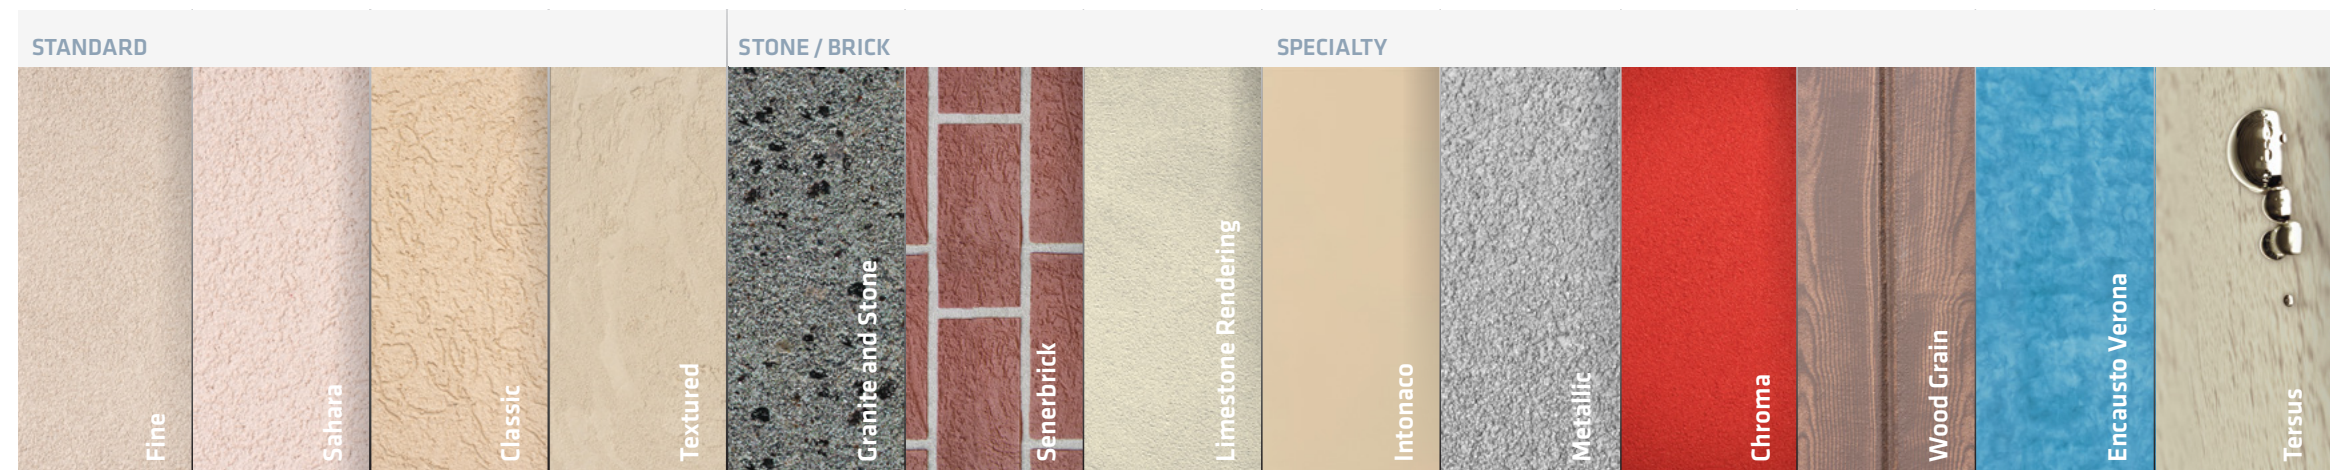

SenerPanel Senershield

UNLIMITED FINISH OPTIONS

A wide range of colors and textures provide tremendous design flexibility, allowing architects to create customized appearances with dramatic visual appeal.

SIKA SEALANTS

The design of the joint, the performance of the sealant and cladding, and the compatibility between the sealant and surrounding materials are all crucial factors when finishing the building envelope.

For added peace of mind, select Sika Sealants to benefit from a single-source warranty and ensure optimal compatibility with adjacent materials.

Our most current General Sales Conditions shall apply.
