

SIKA AT WORK

French Quarter, Seattle, WA

LIQUID APPLIED ROOFING & WATERPROOFING
Sikalastic RoofPro 20 - Sikalastic 644

BUILDING TRUST

PROJECT DESCRIPTION

French Quarter Condominium sits right on the shores of Lake Washington. Over time, the wood decks deteriorated and needed to be rebuilt and repaired.

PROJECT SOLUTIONS

The Sikalastic RoofPro 644 Lo-VOC membrane system was chosen for its excellent track record in the wet environment of Seattle and the ability to install thinset and tile over burden. This system choice provided long term protection to the repaired wood decks. It also provided the owners and the applicator with a high quality waterproofing membrane system that the applicator knew would perform. Trinity Waterproofing continues to be one of Sika LAM's valued applicators in the Seattle area.
