SIKALASTIC ROOFPRO IN THE NORTH WEST

PGE Park – Snyder Roofing Portland

Sikalastic RoofPro began its debut into the Northwest market at what used to be known as PGE Park when it was being retrofitted for the Portland Timbers soccer club. The observation deck also being the roof over occupied space required more than just a deck coating. Sikalastic RoofPro from Sika was chosen for its waterproof integrity but also for its ability to withstand foot traffic.

41st Street Condo's – Trinity Waterproofing

The next opportunity came with waterproofing the 41st Street Condo's in West Seattle. A wood deck with existing urethane deck coating at the penthouse level and a concrete deck over the parking garage were waterproofed using the Sikalastic RoofPro system.

Home Plate Center – A Clark Company

With the help of Sika's distributor, Atlas Supply, the Home Plate Center roofs and plaza decks were obtained and waterproofed with the Sikalastic RoofPro system. Since 2016 King 5 News has called Home Plate Center its home.

Iconic Landmark Seattle – Nations Roof Northwest

With over 177,000 ft² from the top of the iconic Seattle landmark to basement foundation footer waterproofing, balcony decks to roof recovers, Sikalastic RoofPro continues to waterproof high end commercial as well as multifamily residential properties in the Northwest

Jackson Federal Building – Commercial Industrial Roofing

Jackson Federal Building was designed with a large overhanging gutter to collect the rain run-off from the metal roof. During replacement of the metal roof, the gutters were also specified to be relined with a PMMA system. The applicator was very concerned with odor and came to Sika for an option. With the Sikalastic 641 Lo-VOC's low odor, single component with no mixing required formulation the applicator was able to line these large gutters with a fully reinforced Sikalastic RoofPro membrane system

Sika has several trained applicators in the Northwest market that can assist with your roofing or waterproofing projects. Please contact Atlas Supply or William Clark and Associates with your projects and questions.
