

# CONCRETE Sikacrete®-752 3D

- All-in-one bag, just mix with water
- Suitable for all climate conditions
- Fast setting and low shrinkage
- Smooth appearance and excellent durability

## Sikacrete®-752 3D 1-PART MIRCO-CONCRETE FOR 3D PRINTING

#### **ALL-IN-ONE SOLUTION FOR 3D CONCRETE PRINTING**

Sikacrete®-752 3D is a modified cement-based micro-concrete with selected aggregates and additives. With its desirable finished color appearance of white, the uses of Sikacrete®-752 3D are endless.

#### **BUILDING A 3D WORLD WITH CONCRETE**

Sikacrete®-752 3D is a 1-part mirco-concrete that is mixed with water and available as 55 lb bags or 2000 lb super sacks. Suitable for continuous and static mixers and designed to be easy for pumping with reduced equipment wear. With its unique ability of achieving a smooth appearance and excellent crack resistance, Sikacrete®-752 3D is the answer for your 3D printing needs.

#### THE ADVANTAGES:

- All-in-one bag, just mix with water
- Fast absorbing
- Low viscosity for easy pumping
- Manufactured in the USA no ocean freight cost
- Print line stability and accuracy
- Capable of printing at angles
- Can be printed through a 3 mm to 75 mm nozzle
- Maintains shape after extrusion

#### PRINTING OF 3D OBJECTS AND COMPONENTS FOR:

- Buildings and Civil engineering structures
- Molds and forms
- Art, craft, and visual display
- Interior and exterior use

**BUILDING TRUST**
