Hazardous combustion prod- :

ucts

harmful vapours nitrogen oxides

fumes/smoke carbon black carbon oxides

Further information : The degree of risk is governed by the burning substance and

the fire conditions.

If exposed to fire, keep containers cool by spraying with water. Collect contaminated extinguishing water separately, do not

allow to reach sewage or effluent systems.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emer-

gency procedures

Do not breathe vapour/aerosol/spray mists.

Wear eye/face protection. Remove all sources of ignition.

Beware of vapors accumulating to form explosive concentra-

tions. Vapors can accumulate in low areas.

If exposed to high vapour concentration, leave area immedi-

ately.

Use personal protective clothing.

Handle in accordance with good building materials hygiene

and safety practice.

Environmental precautions : Contain contaminated water/firefighting water.

Do not discharge into drains/surface waters/groundwater.

Methods and materials for containment and cleaning up

Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local

/ national regulations (see section 13).

SECTION 7. HANDLING AND STORAGE

Advice on protection against :

fire and explosion

Keep away from open flames, hot surfaces and sources of

ignition.

Take necessary action to avoid static electricity discharge

(which might cause ignition of organic vapors).

Do not spray on a naked flame or any incandescent material.

Advice on safe handling : Avoid aerosol formation.

Avoid inhalation of mists/vapours.

Avoid skin contact.

Avoid contact with eyes.

Conditions for safe storage : Keep only in the original container in a cool, dry, well-

ventilated place away from ignition sources, heat or flame.

Keep tightly closed.

Protect from direct sunlight.

No smoking.
