#### **BASIS OF PRODUCT DATA**

Results may differ based upon statistical variations depending upon mixing methods and equipment, temperature, application methods, test methods, actual site conditions and curing conditions.

#### **LIMITATIONS**

- Users must read the most current Product Data Sheets for each system component before using any products and follow all application instructions and cautions.
- Painted and otherwise coated surfaces should be inspected and prepared as approved by Sika Facades before application.
- Ensure substrate is free of all form releasing agents or other residue. The applicator shall verify that the proposed substrate is acceptable prior to the PAREX® MVS CMU installation.
- Reference system specification for testing information.
- When used on retention wall or areas where moisture may accumulate or enter the opposite side of the wall, a waterproofing material is required on the opposite side of the wall to eliminate negative hydrostatic pressure.
- Ensure tops of walls are capped or otherwise properly protected.
- Locate joints in adhered veneer above joints in CMU or concrete substrates and where indicated by design professional.
- Contact SIKA Facades' Technical Service Department at 1-800-226-2424 for additional information.
