**SIKAFLEX®-2C NS EZ MIX+ SUBSTITUTION SUBMITTAL**

August 20, 2024

To Whom it May Concern,

Please be advised that Sika now offers the Sikaflex®-2c NS EZ Mix + in lieu of the Sikaflex®-2c NS EZ Mix to meet your two-component, high-performance sealant needs. Sika is moving to this next generation 2-component material to provide the market with overall higher performance and improved application properties. You are being presented this letter because the Sikaflex®-2c NS EZ Mix that you have specified is no longer available in the market.

The Sikaflex®-2c NS EZ Mix+ (both pre-tinted Limestone and Tint Base versions) offers the same application parameters and specification conformance, as the regular Sikaflex®-2c NS EZ Mix, with the ability to offer +/- 50% joint movement capabilities. The expansion-compression properties therefore designate the product as a true Class 50, per the ASTM C 920 specification. The Product Data Sheet, for the Sikaflex®-2c NS EZ Mix+ (attached), will illustrate it not only being a direct replacement for the Sikaflex®-2c NS EZ Mix, but also provide its key performance characteristics.

Best Regards,

Florian Doebbel
