FLEX-TITE CLIPS
INSULATION ATTACHMENT SYSTEM

PRODUCT DESCRIPTION
Flex-Tite insulation clips are quick, easy, and efficient to work with. They provide a finishing touch that is attractive as well as functional. They are designed to save labor in installation, and save energy once finished. Suitable for use in metal buildings, wood framed and concrete construction.

FEATURE AND BENEFITS
• Energy Efficient Design – unique co-extruded design, combining rigid and soft PVC to hold insulation tightly in place and create an air-tight seal
• Easy Handling – can be cut with standard power saws and two piece design allows for easy installation of the insulation
• Convenient – fastening leg for easy access with a nail gun, reducing installation time
• Impact-Resistant PVC – designed to withstand the high impact of nail guns
• Attractive Finish – manufactured to an attractive white finish. As desired, pieces can be painted or call for custom color applications.
• UL Tested – Class A material, tested by Underwriters Laboratories (UL 723 – test for surface burning characteristics of building materials). Flame spread is 0 and smoke developed equals 190.

INSTALLATION
• Step 1 – Align the Flex-Tite J-Channel horizontally at the desired height and check for level. Nail or staple into place.
• Step 2 – Align the Flex-Tite female clip vertically at desired spacing and check for plumb. Nail or staple into place.
• Step 3 – Insert insulation into Flex-Tite J-Channel and install Flex-Tite male clips.
NOTE: For framed construction, do not span framing with Flex-Tite clips.

MANUFACTURED BY VICTORY BEAR, A DIVISION OF FUKUVI-USA, INC. / SOLD BY RMAX
