

SIKA AT WORK

Tampa Water Street - Heron
Tampa, FL

LIQUID APPLIED ROOFING & WATERPROOFING
Sikalastic®RoofPro 20 - 621TC Custom Color

BUILDING TRUST

PROJECT DESCRIPTION

A cross sell opportunity among multiple business units, Sika presented a unique position of being able to produce multiple products and waterproofing systems in the same custom colors chose by the specifiers and owners. Roofpro could be left exposed and sanded for aggregate finish while providing roof membrane protection over occupied spaces. Roofpro was chosen to compliment the modern architecture while still providing the best waterproofing protection.

PROJECT SOLUTIONS

The roof membrane over occupied spaces could be left exposed, with aggregate added for nonslip and custom colored to match the other finishes/textures of the modern design. As a result, a 20 year roof system that matches the Sika deckpro coatings elsewhere on the building was installed.

PRODUCTS USED

- RoofPro 621TC custom col
- RoofPro 624WP
- Sika EP Primer
- Sika Concrete Primer Lo-VOC
- Sika Reemat
- Sika Flexitape Heavy,

PROJECT PARTICIPANTS

- Engineer: Kohn Pederson Fox
- General Contractor: Coastal Construction
- Contractor: Alpha Insulation & Waterproofing
- Distribuors: Division 789 & Coastal Construction Products
