LEARN MORE

## WHERE TO USE

- Leveling of new or existing concrete or plywood surfaces before the installation of a final floor covering
- Residential, commercial and institutional use
- Typical thickness application 1/8 in. up to 2 in.

## ADVANTAGES

- Install non-moisture sensitive floor coverings after 2 to 3 hrs.
- Fluid and self-leveling - Low dust
- Provides a flat and smooth substrate
- Floor coverings (carpet, vinyl, PVC, rubber, wood) can be installed after 1 to 3 days
- Compatible with in-floor radiant heating
