**SELF CERTIFICATION FOR CDPH STANDARD METHOD
V1.2-2017**

Lyndhurst, 20 August 2018

To Whom It May Concern:

Attached please find a test report for CDPH Standard Method V1.2-2017 from Berkeley Labs showing that Sikafloor® 330 passed the VOC criteria for subject standard. Sika Corporation manufactures Sikafloor® 330 at its Marion, OH facility.

Sika Corporation maintains a Quality Management System at its Marion facility that has achieved ISO 9001 2015 certification. As part of its ISO 9001 2015 program the facility tests finished products and incoming raw materials to insure that the products produced at both facilities meet quality requirements.

Based on the above information Sika Corporation can certify that Sikafloor® 330 will meet the requirements of CDPH Standard Method v1.2-2017.

If further information is required please feel free to contact me.

Sincerely,

Steven A. Rosenberg
