Product Data Sheet Edition 3.2.2011 Sikagard Hygiene HD

Sikagard Hygiene HD

Elastomeric Hybrid Acrylic Wall and Ceiling Coating

	Sikagard Hygiene HD is a seamless highly durable wall and ceiling system that can be installe with or without Reemat fiberglass reinforcement (Standard or Decorative). The Sikagard Hygiene HD system provides a high build, abuse resistant cleanable finish.			
Where to Use	 Pharmaceutical and cosmetic manufacturing facilities Commercial kitchens 			
	Food and beverage processing facilities			
	Health care facilities			
	Laboratories			
	Clean rooms and sterile e	environments		
Advantages	Self protective against the growth of mold, bacteria, yeast, fungi, ecoli			
	■ Single component			
	■ Low odor			
	Suitable for hot water wash downs			
	■ Excellent impact resistance			
	■ Water vapor permeable			
	Seamless substrate movement			
	Excellent color stability			
Chemical	Refer to the Chemical Resi	stance Guide of the top co	oat applied or consult Sika Technical	
Resistance	Services at 800-933 SIKA (
		· ·		
	Typical Data			
	Chemical Base	Waterborne acrylic/polyurethane	e copolymer dispersion	
	VOC Content	0.22 lb/gal. or 81.7 g/l		
	Water Vapor Transmission	perms @ 4 mil DFT	and a f flame	
	Fire Retardancy	Excellent resistance to surface		
	Accelerated Weathering ASTM G53-88- 5,000 hours Q.U.V. ('B' lamps) – no discoloration, chalking or c Slight loss of gloss.			
	Tensile Elongation (BS EN ISO 527-3-Unreinforced)

Limitations		ntilated conditions. Always ensure adequate ventilation.		
	• Do not thin or brush out like conventional paints (thinning for primer use is permissible).			
	■ Do not apply the products below a minimum temperature of 40°F (4°C) or a maximum of 90°F (32°C) throughout the application period. Conditions must remain a minimum of 40°F			
	$(4^{\circ}C)$ and $5^{\circ}F$ (-15°C) above the dew			
	 Protect from frost, freezing and high 	-		
	 Product is not suitable for open fibro 			
		<i>i</i> intended to be used internally, however if used external		
	the natural weathering process of the	e material may cause slight darkening of the colors ar		
	progressive loss of gloss with time. All	colors are intermixable.		

Application by roller may result in a slight surface texture when using standard coverage rates. If a smoother finish is required apply 3 thinner coats to achieve desired DFT. Previous coat must be completely dry prior to overcoating.

Ensure entire surface is fully dried before proceeding. Crazing may occur when overcoating undried surfaces or when material is applied in a heavy application.

Good ventilation is required for Sikagard 307 W Sterisept to dry properly.

Gloss is effected by humidity and temperature.

The incorrect assessment and treatment of cracks may lead to a reduced service life and reflective cracking.

If additional heating is required, do not use gas, oil, paraffin or other fossil fuel heaters; these methods produce large quantities of carbon dioxide and water vapor, which may adversely affect the finish. Use only electric powered warm air blower systems.

New concrete should be allowed to cure/hydrate for a minimum of 10 days and preferably 28 davs

- Caution Sikagard 307 W Sterisept: WARNING: IRRITANT. Polyurethane (Mixture), Butyl Carbitol (CAS: 112-34-5) and N-methyl-2-pyrrolidone (CAS: 872-50-4). Causes eye/skin/respiratory irritation. Harmful if swallowed. WARNING: This product contains a chemical known to the State of California to cause birth defects or other reproductive harm.
- Sikagard 307 W Sterisept: Eyes Hold eyelids apart and flush thoroughly with water for 15 **First Aid** minutes. Skin - Remove contaminated clothing. Wash skin thoroughly for 15 minutes with soap and water. Inhalation - Remove to fresh air. Ingestion - Do not induce vomiting. Dilute with water. Contact physician. In all cases contact a physician immediately if symptoms persist.
- Handling and Sikagard 307 W Sterisept: Avoid direct contact. Wear personal protective equipment (chemical Storage resistant goggles/gloves/clothing) to prevent direct contact with skin and eyes. Use only in well ventilated areas. Open doors and windows during use.
- **Clean Up** Sikagard 307 W Sterisept: Use a properly fitted NIOSH respirator if ventilation is poor. Wash thoroughly with soap and water after use. Remove contaminated clothing and launder before reuse. Use personal protective equipment (chemical resistant gloves/ goggles/clothing). Without direct contact, sweep up spilled or excess product and place in suitable sealed container. Dispose of excess product and container in accordance with applicable local, state, and federal regulations.
- Additional Info Technical Data Sheets are updated periodically. To ensure the most current version is being used, visit Technical Resources on www.sikafloorusa.com. Proper material application is the responsibility of the user. Site visits made by Sika personnel are for making technical recommendations only and not for supervising or providing quality control. Before applying for protection against specific chemical environments, consult Chemical Resistance Guide or Sika Technical Service. Previously applied finishes are subject to practical field evaluation to determine appropriate preparation, primers, etc. Masonry backings may require cement plaster finish if it is desirable to have the wall in perfect plane.

KEEP CONTAINER TIGHTLY CLOSED • KEEP OUT OF REACH OF CHILDREN • NOT FOR INTERNAL CONSUMPTION • FOR INDUSTRIAL USE ONLY All information provided by Sika Corporation ("Sika") concerning Sika products, including but not limited to, any recommendations and advice relating to the application and use of Sika products, is given in good faith based on Sika's current experience and knowledge of its products when properly stored, handled and applied under normal conditions in accordance with Sika's instructions.
