

SOLUTIONS FOR DATA CENTERS

WE UNDERSTAND THE CHALLENGES OF FAST-TRACK CONSTRUCTION AND TIME CONSTRAINTS AT SIKa. Our specialized solutions for data center construction are designed to meet your specific engineering and construction requirements: enhancing performance, improving energy, efficiency, or cutting costs.

We can offer expert guidance and innovative solutions that address your unique specifications. Our systems can boost performance and potentially decrease operating expenses, ensuring that your data center stays at the forefront of innovation, efficiency and sustainability.

GLOBAL BUT LOCAL PARTNERSHIP

WE ARE SIKa

With more than 100 years of experience, Sika is a worldwide innovation and sustainability leader in the development and production of systems and products for commercial and residential construction, as well as the transportation, marine, automotive, and renewable energy manufacturing industries.

Sika has subsidiaries in 102 countries around the world and, in over 400 factories, produces innovative technologies for customers worldwide. In doing so, it plays a crucial role in the transformation of the construction and transportation sector toward greater environmental compatibility. With more than 34,000 employees, the company generated sales of CHF 11.76 billion in 2024.

Our most current General Sales Conditions shall apply.

DATA CENTERS PRODUCT SOLUTIONS FROM CONCEPT TO CONSTRUCTION

BUILDING TRUST

BUILDING TRUST

ONLY SIKA CAN....

THE RIGHT PARTNER IS KEY TO ACHIEVING YOUR PROJECT GOALS. With experts throughout the organization, Sika can provide product solution support throughout all phases of a project, from conceptual design to construction, long-term maintenance, and refurbishment. We leverage Sika's global technologies and our in-depth knowledge of local building needs, regulations, and codes to develop innovations that help you become more successful and drive sustainable construction.

Sika's product solutions, represent over a 100-year innovation and market leadership legacy. Sika has experience developing and producing the most comprehensive range of innovative product solutions and systems for all projects in building and infrastructure construction that bond, seal, cover, strengthen, reinforce, repair, and protect every building portion.

Sika's Building Solutions is a resource for integrated, compatible products and systems that produce superior performance for all parts of a building or structure. Customized product solutions from Sika minimize the effects of threatening environmental conditions on a building, help extend your project's life, and maximize return on investment. Only Sika Can provide the largest comprehensive portfolio of solutions from below-ground waterproofing to industry-leading roofing systems and everything in between your projects.

DEDICATED SUPPORT

Sika's dedicated team of professionals can offer a customized solution for projects of all scales. We help through all phases with services, including:

- Industry and technical experts
- Customized, value-added solutions
- Specifications & engineering details
- Sustainability documentation
- Application training
- Local support
- Single source warranty assistance

SINGLE SOURCE WARRANTY & MATERIAL COMPATIBILITY

Only Sika can provide a team of experts and comprehensive solutions to make the building process run more smoothly from initial concept to construction to long term maintenance. From below grade structural systems and waterproofing to the roof, only Sika can promote single-source compatible systems, enhance the appearance of structures, and extend the life of a building and many of its core components.

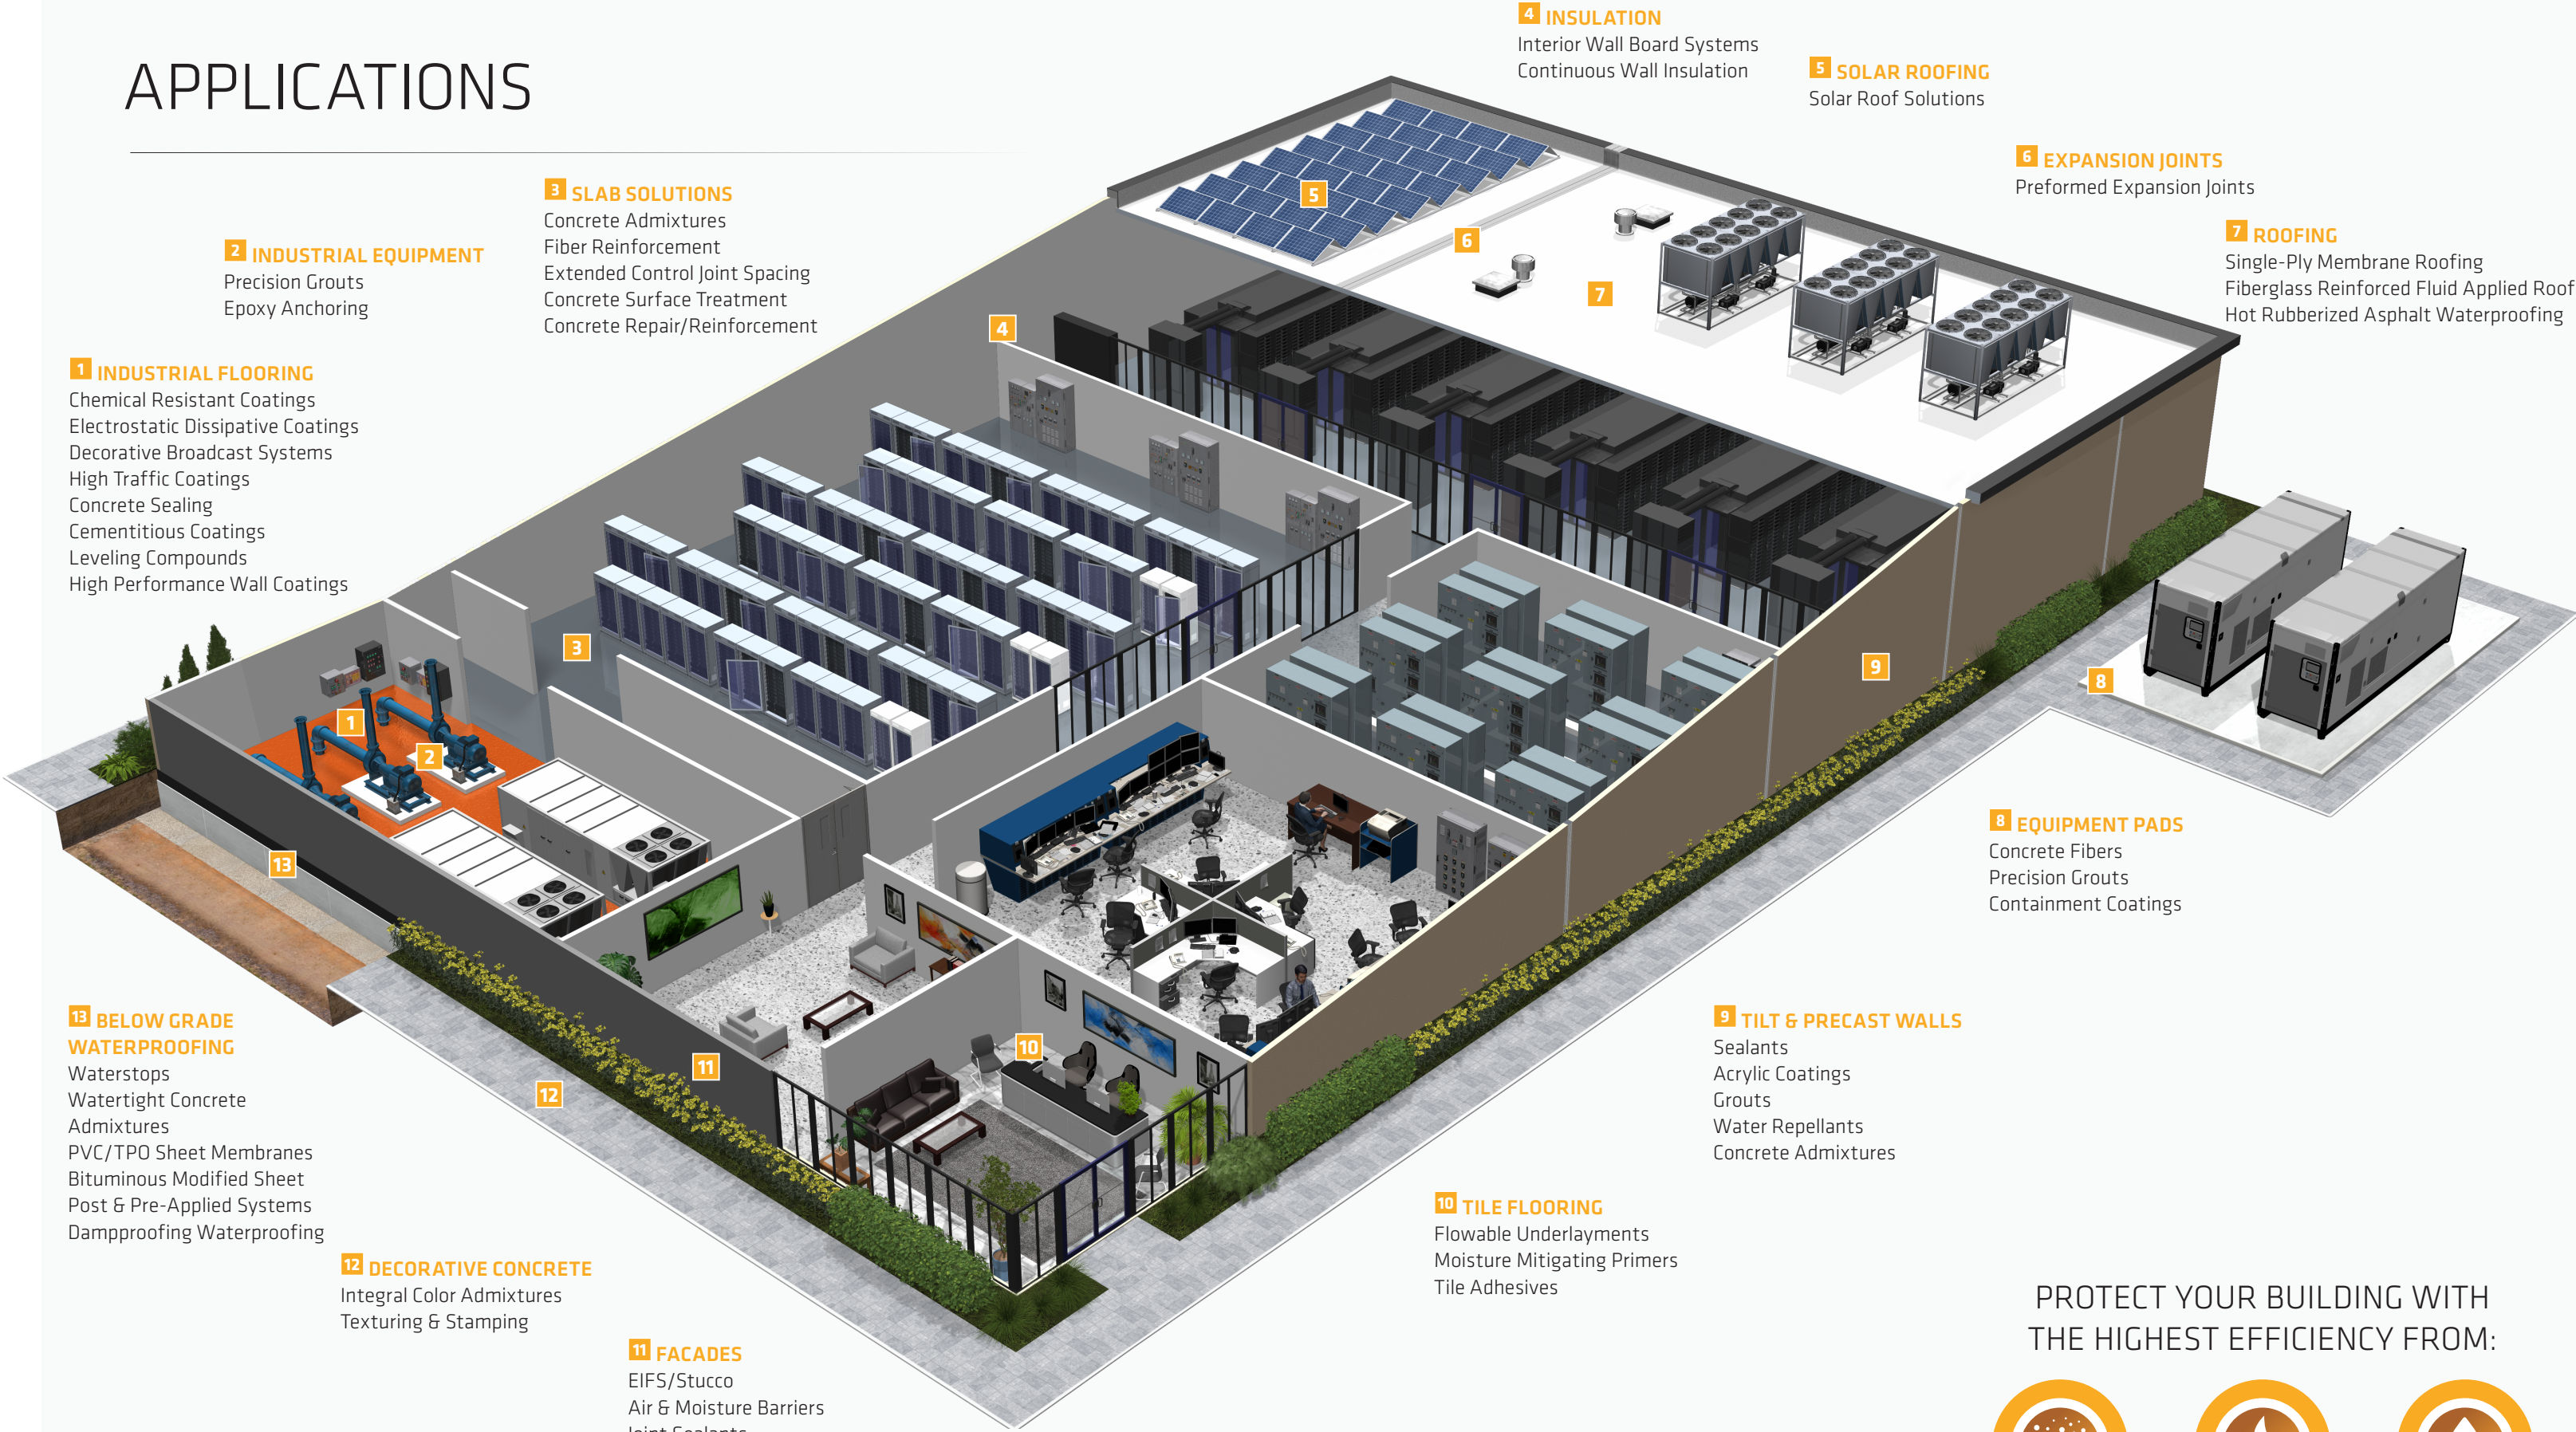

With the world's largest selection of innovative construction products, Sika's material compatibility allows you to protect your building assets by specifying single-source construction material warranties all while reducing schedules, saving money, and promoting sustainable building practices.

For additional warranty information, please contact your local Sika representative, as warranty terms may vary by product.
