

Sikalastic®

Sikalastic® 835 I

HOT SPRAY APPLIED PURE POLYUREA

Sikalastic® hot spray applied resin is a 2-component high performance, pure polyurea membrane. It is highly elastic, 100% solids, and a very fast curing liquid membrane. A waterproofing solution for both new construction and refurbishment projects.

- High impact, abrasion and puncture resistant
- Can be applied in temperatures of (5°F to +158°F)
- Spray applied with special two-part hot spray equipment
- Strong resistance to many chemicals

This product is compatible with a wide range of substrates, including concrete, screed, metal, bituminous membranes, masonry, and wood. It can be used as a protective coating for concrete structures such as decks, bridges, and tunnels, as well as for metal and concrete water-retaining systems like dams, canals, tanks, petrochemical safety tanks, and pipelines. Additionally, it is suitable for waterproofing roofs designed for vehicle access, whether covered with concrete or other live or decorative overburden materials.

Sikalastic® 835 I

HOT SPRAY APPLIED, WATERPROOFING PROTECTION

APPLICATIONS

- SIKALASTIC® 835 I AS STAND ALONE WATERPROOFING DIRECT TO SUBSTRATE
- SIKALASTIC® 835 I WITH SIKALASTIC® 701 SF TOP COAT AS AN EXPOSED SYSTEM

ADVANTAGES

- Little to no VOC content ≤ 1.0 g/l
- Quick cure (5-seconds)
- Highly chemical resistant
- Highly elastic, crack bridging
- Excellent anticorrosion protection
- High impact, abrasion and puncture resistant
- Permanent immersion water resistant
- Special hot spray equipment is required

Our most current general sales conditions shall apply.
Please consult the Product Data Sheets prior to any use and processing

PRIMERS

Sikalastic® EP Primer/Sealer:

Versatile for many substrates

Sikalastic® GDC Primer:

Green, Damp, or Dry Concrete

Sikalastic® Concrete Primer Lo-VOC:

Concrete, Masonry or Wood

COLORS & PACKAGING

Sikalastic® 835 I – A/B Set, 109-gal

Colors: White, Black, Standard Grey
& Custom Colors (4-set min order)
