

Sarnafil®

ROOFPOINT™ REGISTERED PROJECT

WELLS FARGO ARENA

Arizona State University, Tempe, Arizona

PROJECT DESCRIPTION

Basketball takes place inside ASU's Wells Fargo Arena, but sustainability was the name of the game when it came time to replace the aging roof atop this sizeable sports complex. ASU installed 2,100 solar panels on their 90,000 sq. ft. roof. The new roof featured Sika Sarnafil's EnergySmart Roof®, which is solar ready and will further help to reduce arena energy consumption. The white EnergySmart Roof membrane reflects the sun's rays to help keep building interiors cooler and also helps to keep solar modules cool, as well, contributing to their efficiency. ASU now has 66 solar installations currently active on its four campus locations in addition to a research park, resulting in the largest university solar portfolio in the U.S.

ABOUT ROOFPOINT

RoofPoint is a voluntary, consensus-based green rating system developed by the Center for Environmental Innovation in Roofing to provide a means for roofing contractors, building managers and designers to select roof systems based on long-term energy and environmental benefits. RoofPoint provides a simple, transparent and professional measure to validate that new and replacement roof systems are designed, installed and maintained in accordance with the most current sustainable best practices.

PROJECT INFORMATION

BUILDING OWNER: ARIZONA STATE UNIVERSITY

ROOFING CONTRACTOR: PROGRESSIVE ROOFING

ROOF SYSTEM MANUFACTURER: SIKA SARNAFIL

YEAR COMPLETED: 2011

ROOF SIZE: 87,000 SQ. FT.

PROJECT SUBMITTED BY: STEPHEN BURKE
