Sikafloor® DecoDur® Systems

Tough Flooring Doesn't Have To Be Boring

Achieve seamless artistic impact with Sikafloor's creative array of decorative coatings, quartz, flake and specialty aggregates. With unlimited design options Sika's DecoDur flooring systems allow you to create decorative and unique surfaces, ranging from textured broadcast to smooth power float finishes. These remarkable floor systems can repair cracks or imperfections on the surface, as well as completely refinish the concrete flooring area. Sika offers a variety of decorative options for concrete floors in commercial and industrial environments that complement the décor of any facility.

The Sikafloor Advantage

- Can be applied as thin mil, self-leveling or broadcast slurries, and mortars
- Excellent chemical, abrasion, impact and UV resistance
- Available in breathable, water-based chemistries
- Seamless, monolithic easy to maintain surfaces with optional integral cove bases
- Odorless and low VOC
- Does not support the growth of bacteria or fungus
- Superior lifecycle and ROI vs. tile and other traditional flooring products
- Very low maintenance requirements

Offices and Lobbies

Public Spaces

Schools and Universities

Hospitals and Clinics

Engineered From the Ground Up

Beyond aesthetics, many factors such as impact, chemical resistance, temperature requirements, light reflection, and slip resistant textures are important considerations when recommending a flooring system. It is important to fully understand each area's performance requirements to select the appropriate system that best fits the environment.

That's why Sika doesn't just provide off the shelf, cookie cutter solutions. Every project is reviewed for projected use, potential exposures and future operations to recommend the ideal Sikafloor system.

Sikafloor DecoDur Flake FX - DECORATIVE FLAKE FLOOR SYSTEM

Sikafloor DecoDur Flake FX is an aesthetic, easy to clean, seamless floor using a clear epoxy binder that is broadcast with a colored vinyl chip blend and sealed with a transparent or UV stable topcoat. The system is customizable with an extensive blend palette and may be double broadcast for increased thickness. Use examples Include:

- Cafeterias and Restaurants
- Education Facilities
- Healthcare Sites
- Retail and Public Spaces

Formerly known as DecoFlake Broadcast System

Sikafloor DecoDur Flake FS - FAST SET, UV STABLE FLAKE FLOOR SYSTEM

Sikafloor DecoDur Flake FS is a fast setting, single broadcast flake system using high solids polyaspartic and decorative flakes. This is a rapid return to service system that produces a decorative, easy to maintain, seamless floor with excellent durability and chemical resistance. Use examples include:

- Food Preparation and Serving Areas
- Grocery Stores
- Offices and Lobbies
- Corridors and Hallways

Formerly known as DecoFlake Fast Cure UV Stable System

Sikafloor DecoDur Flake WB - DECORATIVE , WATER-BASED FLAKE FLOOR SYSTEM

Sikafloor DecoDur Flake WB is a water based, breathable, aesthetic, easy to clean, seamless floor using a water based epoxy binder, randomly broadcast with colored vinyl chips and sealed with a flexible clear polyurethane matte finish. The system is highly customizable with an extensive color palette. Use examples include:

- Use on High Moisture Concrete
- Medium Duty Manufacturing
- Rest and Break Rooms
- Assembly Areas

Formerly known as DecoFlake WB System

Sikafloor DecoDur Granite FX - DECORATIVE, GRANITE EFFECT FLOOR SYSTEM

Sikafloor DecoDur Granite FX is a decorative epoxy flooring system using Sikafloor 218 DF; a two part, low odor, low viscosity epoxy resin, and Sikafloor DecoDur aggregate. The system is self-leveling and highly UV resistant making it an ideal system for almost any application requiring long term durability and premium appearance. Use examples include:

- Laboratories and Clinics
- Healthcare Facilities
- Cafeterias
- Lobbies and Public Spaces

Formerly known as DecoDur Granite System

Sikafloor DecoDur Metallic FX - DECORATIVE, METALLIC EFFECT FLOOR SYSTEM

Sikafloor DecoDur Metallic FX uses a high solids epoxy and ultra-fine metallic powder to impart aesthetic, multidimensional, pearlescent optics to a high performance floor system. Optional UV and chemical resistant top coats available. Use examples include:

- Retail and Commercial Spaces
- Offices and Corridors
- Hospitality Areas
- Lobbies and Atria

Formerly known as Metallic FX System

Sikafloor DecoDur Quartz FX - DECORATIVE QUARTZ FLOOR SYSTEM

Sikafloor DecoDur Quartz FX is a seamless, decorative, broadcast and sealed epoxy floor, using colored quartz aggregates and finished with a transparent top coat. The system provides a durable, slip resistant finish with excellent mechanical and chemical resistance. Variable slip resistant finishes are available. Use examples include:

- Commercial Kitchens
- Pharmaceutical Manufacturing
- Institutional Facilities
- Showers and Change Rooms

Formerly known as Quartzite Broadcast System

Sikafloor DecoDur Quartz HD- HEAVY DUTY, DECORATIVE, QUARTZ BROADCAST SYSTEM

Sikafloor DecoDur Quartz HD is trowel-applied, heavy duty epoxy mortar used to reprofile rough or deteriorated concrete surfaces or to create thin-set positive slopes to drains. The second layer is a broadcast and sealed epoxy floor, composed of quartz aggregates and finished with a transparent top coat for a seamless and decorative finish. Use examples include:

- Processing Areas
- Manufacturing Plants
- Locker Rooms
- Animal Care Facilities

Formerly known as Quartzite Heavy Duty Broadcast System

Sikafloor DecoDur Quartz TG - TROWEL GRADE QUARTZ FLOOR SYSTEM

Sikafloor DecoDur Quartz TG is a troweled floor system built with a high solids epoxy and colored quartz aggregates. The system produces a robust, decorative, low maintenance, seamless flooring with excellent durability and chemical resistance. Use examples include:

- Stadiums and Arenas
- Healthcare Facilities
- Chemical Processing and Storage Areas
- Rest and Break Rooms

Formerly known as Quartzite 1100 System

Sika FloorJoint S - POLYMER COMPOSITE FLOOR JOINT

Sika FloorJoint S is a flexible joint panel that moves with the slab to provide a level profile without point loading, the root cause of damaged joints. It is a superior solution to common joint fillers, sealants and patches that only last a few months.

- Similar Thermal Expansion to Resinous Floors
- Dampens traffic vibration, improves load distribution
- Quick Install Reduces Downtime
- High Chemical and Mechanical Abuse Resistance
- Seamless Transition Between Existing Slabs
- Non-corrosive and Coatable
- No Welding Required

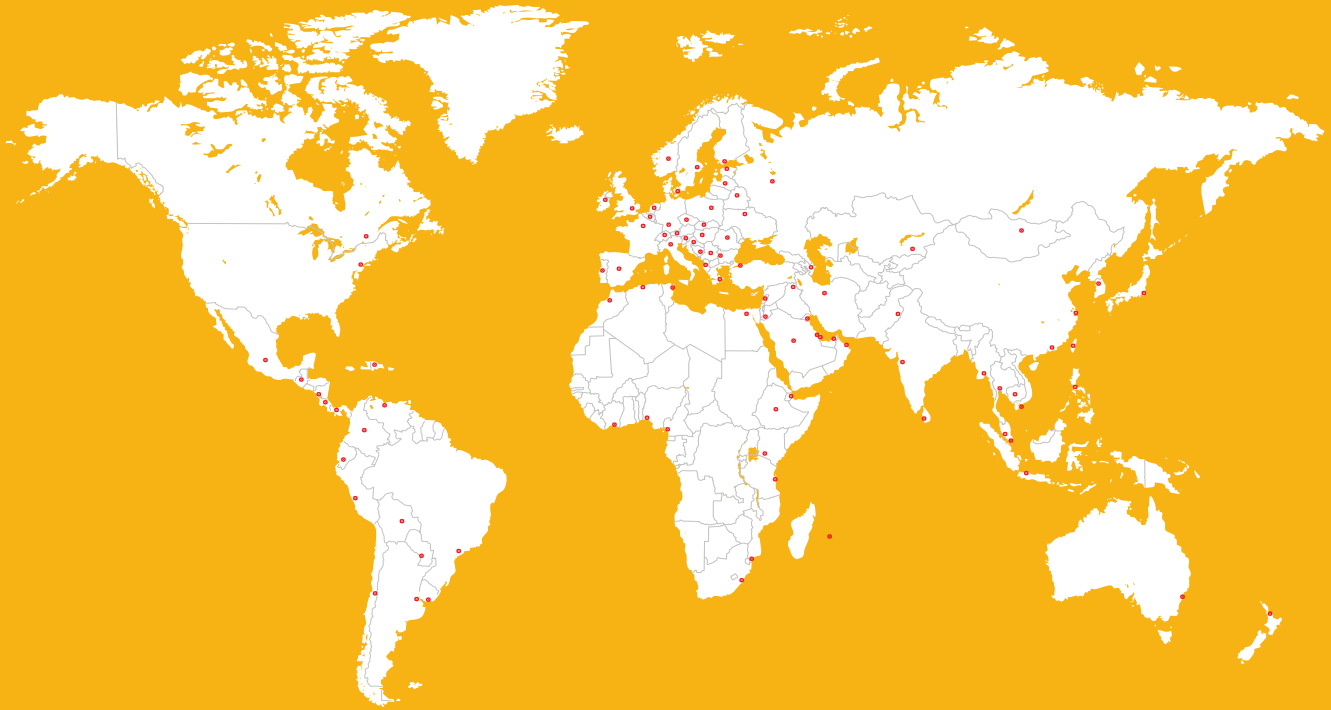

SUSTAINABLE AND RESPONSIBLE CHEMISTRY

Sika is committed to pioneering sustainable solutions to address global challenges, and to achieve this safely at the lowest impact on resources. Creating and increasing value while reducing impact – that is the goal. Our strategy fully integrates sustainability into all our business processes, and we strive to create value for our customers and partners.

Green Building Initiatives and Certification Systems, such as LEED, assess the sustainable performance of building materials and the performance of the whole building. Such initiatives are of growing importance and are consequently influencing the market demand for construction products. Sika is actively participating in these initiatives and programs.

LEED v4, and GreenCircle test certificates along with detailed information on how Sika solutions support sustainable construction, reduce CO2 emissions and help save energy, raw materials and water while meeting sustainable building standards can be found at www.sika.com/sustainability.

WE ARE SIKA

Sika is a specialty chemicals company with a leading position in the development and production of systems and products for bonding, sealing, damping, reinforcing and protecting in the building sector and the motor vehicle industry. Sika's product lines feature concrete admixtures, mortars, sealants and adhesives, structural strengthening systems, industrial flooring as well as roofing and waterproofing systems.
