

# SIKA AT WORK

## University Gutter Repair Providence, Rhode Island

LIQUID APPLIED ROOFING & WATERPROOFING  
Sikalastic®-641 Lo-VOC

BUILDING TRUST

## PROJECT DESCRIPTION

The Engineer of Record used Sikalastic® RoofPro around the University on past projects with such success and high quality installations, they reached out to Sika® once again to see if RoofPro could meet the challenge. The gutters on one of the buildings were in need of repairs and the best access to the gutters was by a cherry picker. Sikalastic®-641 Lo-VOC was chosen for its mobility and versatility. Sikalastic RoofPro products come in 5-gal pails or 50-gal drums for Sikalastic 644 and 641 Lo-VOC resins and can be applied in tight or hard to access places. Our resins are able to waterproof multiple substrates including the metal and EPDM on this project. The EPDM was first repaired with patches of new EPDM but this created many seams within the gutter. Sikalastic® RoofPro systems are cold liquid applied and cure to a seamless fully reinforced waterproofing system.

## PROJECT SOLUTIONS

The hard to access location of the gutters of this University building are now leak free and seamless with a 20-year warranty. Sikalastic® RoofPro is easy to use and mobile in its' 5-gal pails, no mixing required.

## PRODUCTS USED

- Sikalastic®-641 Lo-VOC
- Sika® Concrete Primer Lo-VOC
- Sika® EP Primer/Sealer
- SikaQuick® VOH
- SikaQuick® 1000

## PROJECT PARTICIPANTS

- Engineer: Roof Design & Inspection, Inc.
- General Contractor: Tecta America New England, LLC
- Contractor: East Coast Masonry & Restoration
