

MICRO FIBERS FOR CONCRETE REINFORCING ENVIRONMENTAL PRODUCT DECLARATION CRADLE-TO-GATE SIKAFIBER

General information

Manufacturer Name: SIKA Corporation

4019 Industry Drive

Chattanooga, TN 37416

Program Operator: ASTM International

100 Barr Harbor Drive West Conshohocken, PA

19428-2959, USA

Declaration Number: EPD 718

Reference PCR: ISO 21930: 2017

Date of Issuance: June 4, 2024

End of Validity: June 4, 2029

Product Name: SikaFiber® - Micro Synthetic Fibers

EPD Owner: SIKA Corporation

Declared Unit: 1 kg of SikaFiber®

EPD Scope: Cradle-to-gate (A1, A2, and A3)

Prepared By: WAP Sustainability Consulting

Verification: ISO 21930 serves as the core PCR. Independent verification of the

declaration according to ISO 14025 and ISO 21930.

LCA Reviewer Timothy S. Brooke and EPD Verifier: ASTM International

Company information

Sika is a specialty chemicals company with a globally leading position in the development and production of systems and products for bonding, sealing, damping, reinforcing, and protecting in the building sector and motor vehicle industry. Sika has subsidiaries in 102 countries, manufactures in over 400 factories, and develops innovative technologies for customers around the world that facilitate the sustainable transformation of the construction and transportation industries.

Product information

SikaFiber microfibers are synthetic monofilament and fibrillated polypropylene microfibers for concrete, shotcrete, mortar, and grout that comply with ASTM C 1116, Standard Specification for Fiber Reinforced Concrete and Shotcrete. The fibers (Figure 1) are specifically designed and used for plastic shrinkage crack control, secondary reinforcing applications for slabs and precast concrete. SikaFiber microfibers have been shown to significantly reduce plastic shrinkage cracking when compared to plain concrete. During the plastic settlement phase, the fibers create a three-dimensional support network that resists the downward pull of gravity, thus keeping aggregates in suspension and promoting uniform bleed in the concrete. The micro SikaFiber increases the tensile strain capacity of the concrete during the plastic shrinkage phase. In addition, shotcrete applications the SikaFiber microfibers can reduce rebound and Sika Fibermesh 150f can be utilized to reduce explosive spalling in concrete.

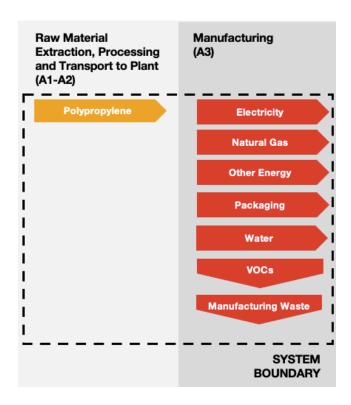

The Sika Fibermesh 150, Sika Fibermesh 150f Sika Fibermesh 300, Sika Fibercast 500, and Sika Fibermesh HP are identical in chemical composition and are similarly manufactured and packaged. The fiber products are differentiated by fiber diameter, length, and degree of fibrillation. Dosage rates will vary depending on the fiber type and reinforcing requirements and can range from 0.5 to 1.5 lbs/yd³ (0.3 to 0.6 kg/m³).

LCA information

Declared unit	1 kg of SikaFiber®
Reference service life	Not declared as use phase is not included in the study
Description of the system boundaries	Cradle to Gate
Geographical representativeness	A1-A3: United States
Time representativeness	Primary data collected for calendar year 2022
Cut-off rules	All flows for which data were provided are included in the assessment, accounting for at least 99% of the energy or mass flows and at least 99% of the environmental impacts from the product system. Production of capital equipment is excluded from this assessment.
Database and LCA	SimaPro 9.0.1
software used	Ecoinvent V3.9.1
LCA Report	LCA of Macro and Micro Synthetic Fibers, WAP Sustainability, February 2023
Scenario Description: A2	Primary data of transportation from suppliers: 1300 km by rail, 32-870 km by truck
Scenario Description: A3	Electricity Source: country-specific residual mix

System diagram:

Exported thermal energy (waste to energy)	ETE	kg	0.00E+00	0.00E+00	0.00E+00	0.00E+00					

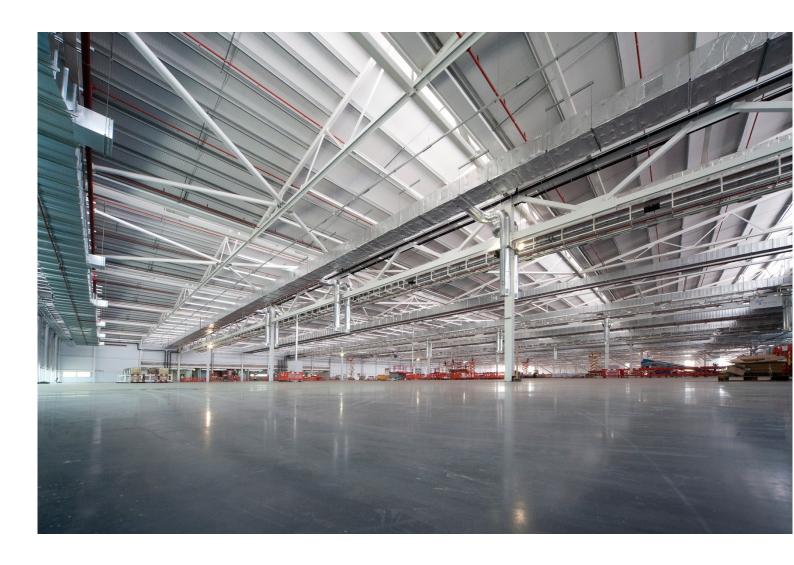

The estimated impact results are only relative statements, which do not indicate the endpoints of the impact categories, exceeding threshold values, safety margins and/or risks. The results of modules A1-A3 shouldn't be used without considering the results of module C. A1-A3 results include the "balancing-out reporting" of biogenic CO₂ of packaging, traditionally released in A5. Additional optional indicators per EN 15804+A2 are not declared, including: particulate matter emissions; ionizing radiation, human health; eco-toxicity (freshwater); human toxicity, cancer effects; human toxicity, non-cancer effects; land use related impacts/soil quality.

Additional environmental information

No additional environmental, social, or economic information is declared in this EPD.

GLOBAL BUT LOCAL PARTNERSHIP

WHO WE ARE

Sika AG, located in Baar, Switzerland, is a specialty chemicals company with a leading position in the development and production of systems and products for bonding, sealing, damping, reinforcing, and protecting in the building sector and the motor vehicle industry.

The corporation has subsidiaries in 98 countries, employs more than 17,000 people worldwide, and has more than 190 manufacturing facilities around the globe.

Our most current General Sales Conditions shall apply.
Please consult the Product Data Sheet prior to any use and processing.
