THE SIKA SARNAFIL

SUSTAINABILITY PROMISE

PERFORMANCE THAT PAYS. SUSTAINABILITY THAT'S SMART

The Sika Sarnafil Sustainability Promise

Sustainability. It's not an abstract idea, not a marketing tactic, not a buzzword. It's a daily decision and a lifelong commitment. And for Sika Sarnafil, it's a proud legacy.

For almost 50 years, Sika Sarnafil has been producing products safely that are safe to use—and good for the environment. We live that commitment the same way we serve our customers: not just by doing the right thing, but by doing things right.

THE PROMISE:

Sika Sarnafil continues to build on its proud legacy for delivering time-proven, earth-friendly, energy-saving roofing and waterproofing systems that align sustainable practices with long-lasting performance. As the proven leader in durability and membrane recycling, and an ISO 14001 and Responsible Care certified company, we are committed to helping building owners, roofing consultants, contractors and architects meet their sustainability goals today—and long into the future.

THE PROOF:

Unsurpassed in Durability

Durability is a key component in any sustainability equation. Our proven thermoplastic membranes continue to deliver unsurpassed performance and value, even after decades of use.

First in Recycling

Our innovative recycling program was the first in the US for commercial single-ply roofing membranes. We don't stop at recycling production waste—we also reprocess vinyl membranes at the end of their service life on the roof. In the past 6 years alone we diverted more than 20 million pounds of vinyl away from the landfill and into new, high-performance roofing membrane products.

Smartest in Energy Savings

Our proven, ENERGY STAR-qualified membranes deliver energy savings and reduce greenhouse gases. Plus, vinyl takes less energy to produce than other single-ply membranes.

Best in Fire Performance

The threat of fire puts a building's inhabitants—and the sustainable environment—at risk. Vinyl roof membranes provide the best fire performance of any single-ply membrane.

Longest Record in Sustainable Roofing Systems

As the leader in sustainable roofing and waterproofing systems, our time-tested products are durable proof that sustainability and performance go hand-in-hand:

- The EnergySmart Roof,[®] one of the first roofing products qualified by ENERGY STAR
- The EcoSmart Roof,[®] an innovative, reusable and recyclable roofing system
- The EcoBond Roof,[®] a VOC-compliant adhered roofing system
- First in solar-ready roofing systems
- More than 45 years of green roof experience

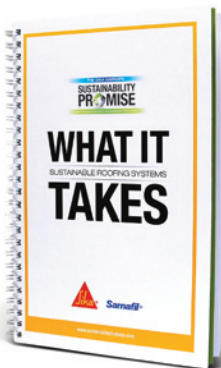

Sarnafil[®]

How does your roof rate?

Here's a checklist of leading sustainable roofing criteria to help you make the lasting choice today—and for decades to come.

CRITERIA	THE SIKA SARNAFIL ADVANTAGE	COMPETITIVE ROOF SYSTEM #1	COMPETITIVE ROOF SYSTEM #2	COMPETITIVE ROOF SYSTEM #3
DOCUMENTED SERVICE LIFE	 <i>Thermoplastic membrane with the longest track record in roofing and waterproofing</i>			
RECYCLABLE INTO NEW ROOFING MEMBRANE	 <i>Vinyl membranes are readily recyclable into new membranes</i>			
ZERO WASTE TO LANDFILL MEMBRANE PROGRAM	 <i>100% membrane production waste recycled</i>			
ROOF TAKE-BACK PROGRAM	 <i>Established roof membrane recycling program</i>			
ENERGY STAR®-QUALIFIED	 <i>The EnergySmart Roof® exceeds ENERGY STAR cool-roofing requirements</i>			
ROOF INSULATION MINIMUM OF R-20	 <i>Sarnatherm insulation available in a wide variety of configurations to meet building-specific requirements</i>			
LESS THAN 50% OIL BASED	 <i>57% of vinyl resin is derived from salt</i>			
LIFE CYCLE ANALYSIS	 <i>Vinyl roofing membranes rated highest in eco-efficiency amongst competing products</i>			
CARBON OFFSETTING	 <i>The energy savings resulting from the use of the EnergySmart Roof more than offset the carbon emissions caused by membrane production</i>			
RESIST SPREAD OF FIRE	 <i>Vinyl membranes perform better in resisting spread of fire than other single ply membranes</i>			
ISO 14001 AND RESPONSIBLE CARE-CERTIFIED	 <i>We take pride in our internationally recognized certifications</i>
