

# ROOFPOINT™ REGISTERED PROJECT

## TD GARDEN

Boston, MA

### PROJECT DESCRIPTION

This roof replacement encompassed a barrel roof and smaller roof areas on 12 different levels. The energy efficient EnergySmart Roof was installed as was the reflective Sikalastic RoofPro Liquid Applied Membrane, for superior flashing capabilities.

In addition to reflective roofing, this project included a major recycling component. The EnergySmart Roof membrane that was installed contains 10 percent recycled content. All of the older vinyl roof that was removed was sent to Sika for reprocessing into new vinyl roofing products. And finally, the new roof can also be removed at the end of its service life and recycled again into new vinyl roof product.

### ABOUT ROOFPOINT

RoofPoint is a voluntary, consensus-based green rating system developed by the Center for Environmental Innovation in Roofing to provide a means for roofing contractors, building managers and designers to select roof systems based on long-term energy and environmental benefits. RoofPoint provides a simple, transparent and professional measure to validate that new and replacement roof systems are designed, installed and maintained in accordance with the most current sustainable best practices.
