

# SikaBiresin® AP861/861-1

(Formerly Adtech Marine 861 ULTRAFAIR)

EPOXY FAIRING COMPOUND - ABOVE OR BELOW WATER LINE APPLICATIONS

## Quick Notes

### PRODUCT POSITION STATEMENT

SikaBiresin® AP861 is a convenient trowelable epoxy filler developed for fairing large surface imperfections on aluminum, steel, fiberglass or wooden marine vessels.

### PRODUCT TECHNOLOGY

- Two-component epoxy fairing compound

### PRODUCT BENEFITS

- Convenient 1:1 volumetric mix ratio
- Water resistant for above or below the waterline applications
- Can be applied up to 1" thick without sagging or shrinking during cure
- Color coded positive mix indication
- Smooth, creamy paste mixes easily and trowels smoothly
- Compatible with fiberglass, wood, aluminum, steel marine vessels
- 0% VOC's (volatile organic compounds)

### APPLICATION

- Fairing large dissimilar material surfaces such as aluminum, steel, FRP and wood
