

Crossgrip XTRA

Crossgrip XTRA is a highly durable, UV resistant, walkway matting for Sika Sarnafil roof systems. Designed for maximum flat roof performance, Crossgrip XTRA enhances slip resistance and is engineered to perform in any climate imaginable.

Crossgrip XTRA's unique two-layer, open grid design allows water to drain easily while also withstanding wind speeds of up to 60 mph. Flexible, Crossgrip XTRA contours to the roof while the deep cut pattern and cross directional top rib improves grip underfoot. Loose-laid, installation is as simple as rolling out the mat and you are done. No adhesive or mechanical attachment is necessary. Best of all, Sika will include Crossgrip XTRA in the Sika roof system warranty for up to 20 years, four times as long as standard Crossgrip.

- Easy to install, just roll and go
- UV Resistant
- All-weather performance
- Tested to ASTM F 1677 for slip resistance
- Included in Sika's roof system warranty up to 20 years
- Withstands wind speeds up to 60 mph
- Fire resistant according to UL 94 HB
- Protects Sika Sarnafil roof membrane
