

Sikadur® Crack Fix

LOW-VISCOSITY, HIGH STRENGTH EPOXY RESIN, INJECTION RESIN, SEALER & ADHESIVE

107655

WHERE TO USE

- Low pressure injection of cracks in structural concrete, masonry, wood, etc.
- Gravity feeding and sealing of fine, non-moving cracks in horizontal concrete, masonry, wood, etc.

ADVANTAGES

- Five times stronger than concrete
- Low viscosity; allows material to penetrate and seal fine, hairline cracks
- Deep, penetrating and tenacious bonding of cracks in **structural concrete**
- Fits standard caulk gun
- Moisture tolerance (for “can’t dry” cracks and surfaces)
- No mess, self-mixing
- Includes 2 static mixers and 2 flow restrictors
- 1 cartridge yields approximately 10.7-11.0 cu. in. of usable epoxy resin
- **Color:** Amber/Clear
