

Sikalastic® 701 SF, Sikalastic® 702

TWO-COMPONENT, POLYASPARTIC/POLYUREA HYBRID RESINS

Sikalastic® 701 SF, Polyaspartic - Sikalastic® 702, Polyurea Hybrid

These two-component resins are part of the Sikalastic® liquid-applied membrane (LAM) system, designed for exposed roofing and waterproofing applications in both new construction and refurbishment projects.

This system provides a reinforcement-free solution for liquid roofing and waterproofing. It features a 100% solids, solvent-free formulation that remains highly flexible after curing, with exceptional elasticity and elongation of up to 850%. Key characteristics include a self-smoothing, high-gloss finish that resists soiling and is easy to clean. The system also offers excellent resistance to long-term water immersion, ponding water, and harsh chemicals.

It's an ideal alternative for projects where application machinery is impractical. The product is supplied in user-friendly pails and allows for quick mixing and easy application using notched rubber or metal squeegees and pin rollers. Its self-smoothing nature makes it especially suitable for flat or slightly sloped roofing and waterproofing surfaces.

- Hand Applied, Cold Applied
- Single layer application
- Local reinforcement only
- Polyaspartic top coat at 10-12 mils wft

BUILDING TRUST

Sikalastic® 701 SF, Sikalastic® 702

EASY TO APPLY, DURABLE, UNREINFORCED FOR NEW CONSTRUCTION OR REFURBISHMENT

APPLICATIONS

- SIKALASTIC® 702 AS STAND ALONE WATERPROOFING DIRECT TO SUBSTRATE
- SIKALASTIC® 702 WITH SIKALASTIC® 701 SF TOP COAT AS AN EXPOSED SYSTEM

ADVANTAGES

- Sikalastic 701 SF - UV stable and non-yellowing
- Unreinforced applications (can be fully reinforced with Parex Synergy reinforcing Mesh 355)
- VOC content well below industry standard
- Sikalastic 701 SF applied maximum @ 10-12 mills wft/dft
- Easy application
- Self smoothing
- Extremely chemical resistant with high gloss finish
- Little to no odor
- Sikalastic 702 THX, Thixotropic for vertical applications

PRIMERS

Sikalastic® EP Primer/Sealer:

Versatile for many substrates

Sikalastic® GDC Primer:

Green, Damp, or Dry Concrete

COLORS & PACKAGING

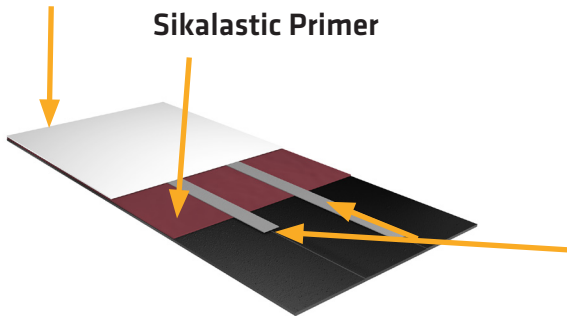

Sikalastic® 701 SF – A/B Kit 1.19-gal – White

Sikalastic® 702 – A/B Kit 5-gal – Light Grey

Sikalastic® 702 THX – A/B Kit 2-gal – Light Grey

Sikalastic® - 702

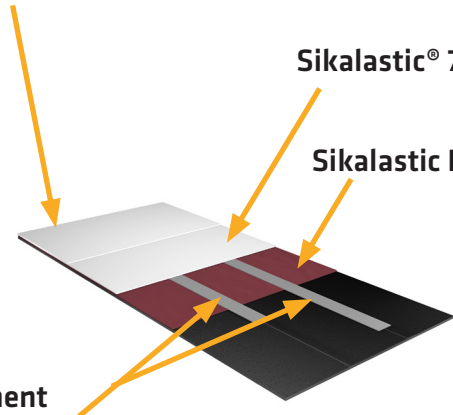

Sikalastic Primer

Sikalastic® 701 SF

Sikalastic® 702

Sikalastic Primer

**Local Reinforcement
or
Stripe Coat 702 THX**
