PROJECT MARKETS SERVED

Sika provides comprehensive product solutions worldwide, for all projects in building and infrastructure construction. Sika's product solutions from below ground waterproofing to industry leading roofing systems, and everything in between, represent over a 100 year legacy of innovation and market leadership.

- 1** Advanced Manufacturing
- 2** Data Centers
- 3** Stadium & Sports Arenas
- 4** Airports
- 5** Hospitals and Healthcare
- 6** Car Parking Garages
- 7** Factories & Warehouses
- 8** Bridges & Highways
- 9** Water Infrastructure
- 10** Dams & Hydropower
- 11** Modular Building
- 12** Residential
- 13** Cement Industry
- 14** Streetscape & Landscaping
- 15** Tunnels
- 16** Mining
- 17** Education
- 18** Hotel, Motel & Resorts
- 19** Wind Energy

BUILDING SOLUTIONS FROM SIKA

YOUR TRUSTED PARTNER IN CONSTRUCTION PROJECTS

ONLY SIKA CAN...

THE RIGHT PARTNER IS KEY TO ACHIEVING YOUR PROJECT GOALS. With experts throughout the organization, including architects, engineers, and contractors, Sika can provide product solution support throughout all project phases, from conceptual design through construction to long-term maintenance and refurbishment. We leverage Sika's global technologies and our in-depth knowledge of local building needs, regulations, and codes to develop innovations that help you become more successful and drive sustainable construction.

Sika's product solutions represent over a 100 year innovation and market leadership legacy. Sika has experience developing and producing the most comprehensive range of innovative product solutions and systems for all projects in building and infrastructure construction that bond, seal, cover, strengthen, reinforce, repair, and protect every building portion.

Sika's Building Solutions is a resource for integrated, compatible products and systems that produce superior performance for all parts of a building or structure. Customized product solutions from Sika minimize the effects of threatening environmental conditions on a building, help extend your project's life, and maximize return on investment. Only Sika Can provide the largest comprehensive portfolio of solutions from below-ground waterproofing to industry-leading roofing systems and everything in between on your projects.

DEDICATED SUPPORT

Sika's dedicated team of professionals can offer a customized solution for projects of all scales. We help through all phases with services, including:
Industry and technical experts

- Customized, value-added solutions
- Specifications & engineering details
- Sustainability documentation
- Application training
- Local support
- Single source warranty assistance

SINGLE SOURCE WARRANTY & MATERIAL COMPATIBILITY

Only Sika can provide a team of experts and comprehensive solutions to make the building process run more smoothly from initial concept to construction to long term maintenance. From below grade structural systems and waterproofing to the roof, only Sika can promote single-source compatible systems, enhance the appearance of structures, and extend the life of a building and many of its core components.

With the world's largest selection of innovative construction products, Sika's material compatibility allows you to protect your building assets by specifying single-source construction material warranties all while the reducing schedules, saving money, and promoting sustainable building practices.

For additional warranty information, please contact your local Sika representative, as warranty terms may vary by product.

SIKA PRODUCTS FALL UNDER 03, 07 AND 09 CSI MASTER FORMAT CODE DIVISIONS

03 00 00 CONCRETE	07 00 00 THERMAL & MOISTURE PROTECTION (continued)	07 00 00 THERMAL & MOISTURE PROTECTION (continued)

to building efficiency, weather tightness and desired aesthetics. Designed to meet the latest codes and requirements, Sika's high-performance insulation products ensure continuous coverage, preventing heat loss through structural interruptions while helping reduce HVAC loads, minimize outdoor air infiltration, and lower overall energy consumption. Sika offers solutions for even the most complex situations and works closely with designers, manufacturers, and contractors in making the right choice.

BELOW GRADE WATERPROOFING

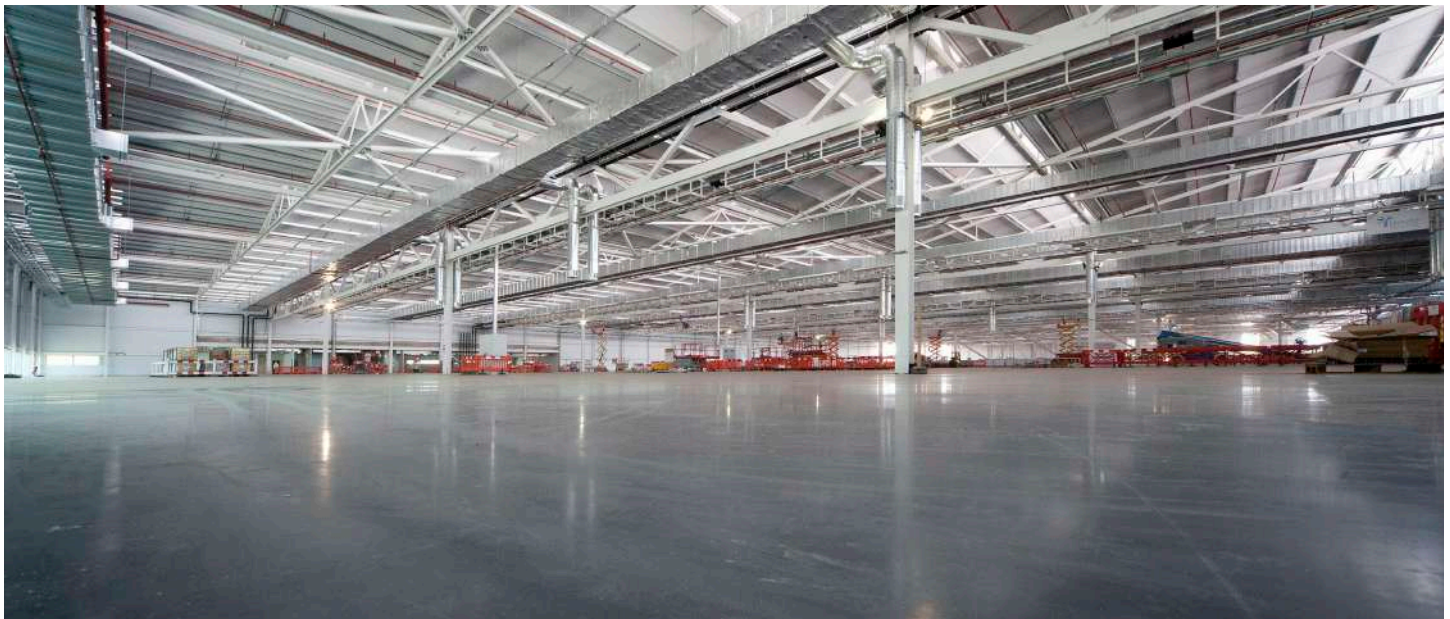

SIKA'S WATERPROOFING MEMBRANES COME IN PRE-APPLIED AND POST-APPLIED OPTIONS TO MEET THE CHALLENGES OF URBAN CONSTRUCTION SITES. As urbanization continues, property developers must optimize congested construction sites and build deeper basements to accommodate parking garages and mechanical equipment rooms. A high-performance waterproofing solution is therefore required to provide dry interior spaces and to protect the foundation system throughout its intended service life. Sika's below-grade systems deliver robust protection against water intrusion while minimizing future repairs and material use. To ensure these stringent requirements are met, Sika has developed products which help to balance the needs of strength and durability with the time and financial challenges of a modern-day construction site.

PRODUCTS	PRODUCT FAMILIES
Below Grade Insulation	Rmax Below Grade Insulation and Protection Board

SLAB-ON-GROUND

VALUE FOR OWNERS, CONTRACTORS AND PRODUCERS ALIKE, SIKA SLAB SOLUTIONS ADDRESS ALL PHASES OF CONSTRUCTION TO POSITIVELY IMPACT SCHEDULES, REDUCE RISK AND LOWER COSTS. Site safety is maximized by removing traditional reinforcement and minimizing saw-cut joints. Cost savings are achieved through the replacement of conventional steel reinforcement with macro fiber reinforcement, combined with optimized concrete mix design. The joints can be extended and curl reduced in the slab with SikaControl® NS, which is a shrinkage reducing & shrinkage compensating admixture.

Sika supports sustainable slab-on-ground solutions from design to pour. These solutions help optimize placement, reduce shrinkage and curling, and improve load capacity - enhancing overall project efficiency. Additionally, SikaFiber® reinforcing fibers are now produced using a 30% more energy-efficient process, reducing embodied carbon and improving sustainability across slab-on-ground projects. With complete project information, Sika can assist in developing project-specific solutions, refining concrete properties to;

optimize placement characteristics, reduce shrinkage, increase load capacity, minimize curling, improve safety. The result is a building-code-accepted solution, with standard details and general notes tailored to each project. This leads to measurable savings in both construction cost and schedule.

CAST-IN-PLACE AND PRECAST CONCRETE

SIKA PROVIDES A COMPLETE RANGE OF ADMIXTURES AND ADDITIVES FOR USE IN CONCRETE, CEMENT AND MORTAR PRODUCTION. Concrete is the most versatile and widely used construction material in the world. Sika concrete admixtures enhance specific properties of the fresh or hardened concrete, such as workability, water tightness, durability, early and final strengths, and finishing. These solutions also help reduce material waste, lower water and energy usage, and extend the lifespan of concrete structures, supporting more sustainable cast-in-place and precast construction. Sika concrete admixtures are the essential ingredient as building construction becomes more complex and as structures are built taller and faster. From production to placement and finishing, Sika makes building with concrete possible as the evolving construction landscape demands faster, better and stronger materials.

CONCRETE REPAIR & PROTECTION

REPAIRING, PROTECTING AND MAINTAINING STRUCTURES OF ALL TYPES IS A NECESSARY AND WORTHWHILE INVESTMENT TO EXTEND A STRUCTURES USABLE SERVICE LIFE. Preserving the built environment is one of the most sustainable actions we can take. Sika offers a wide range of cement and synthetic resin mortars which can be placed, poured or injected for applications ranging from cosmetic to structural repairs. Sika's high-performance repair and protection solutions are designed to restore structural integrity, reduce the need for demolition and reconstruction, and minimize material waste—helping to lower environmental impact and conserve valuable resources. Sika's concrete repair materials are specifically engineered to meet the rigorous demands of the industry, such as high strength, fast turn around and low shrinkage.

PLAZA DECKS

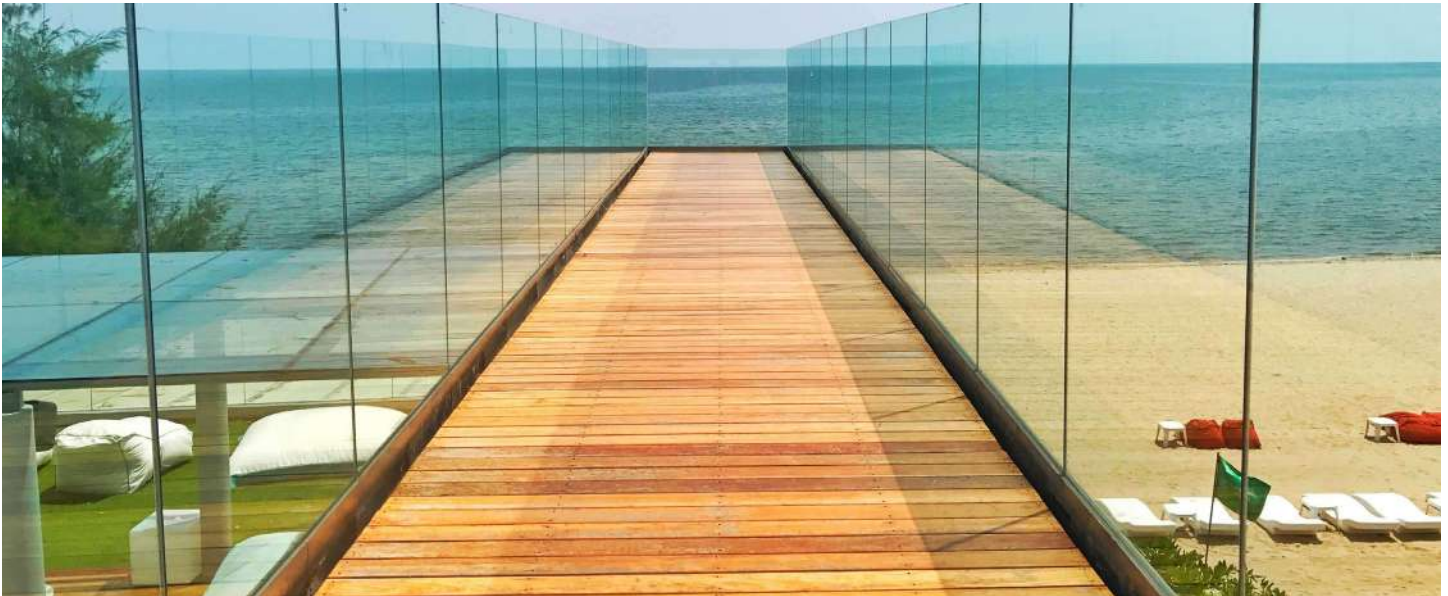

PLAZAS ARE AN IMPORTANT FEATURE FOR MANY BUILDINGS, PROVIDING THE WELCOME AMBIANCE OF AN OUTDOOR AREA FOR PEOPLE TO GATHER, REFLECT AND INTERACT. Typically, having occupied spaces immediately below or adjacent, plazas present a unique waterproofing challenge of having to protect property and occupants against moisture and liquid water penetration. Plaza decks and balconies require robust waterproofing to protect the spaces and people beneath them, while also managing excess water and reducing stormwater runoff to support sustainable site development. Additionally, this waterproofing must typically work in conjunction with some form of paver system on pedestals, a mortar bed, or a concrete wearing slab. Sika’s comprehensive line of products helps to navigate these technical challenges while providing the decorative elements to compliment any application.

BALCONIES

BALCONIES MUST STAND UP TO ALL OF THE DEBILITATING ELEMENTS OF THE OUTDOORS AND FUNCTION AS A COMFORTABLE AND ATTRACTIVE LIVING SPACE. However, these outdoor living spaces are highly stressed because they are permanently exposed to the weather on multiple sides. Unless properly mitigate and protected, the effects from heat, frost, rain and other pollutants can deteriorate and damage balconies shortening their safe useable life. Some states such as New York, California and Florida have implemented mandatory balcony inspection and repair regulations to ensure balconies are maintained for minimum life safety standards. Sika has high performance products that will repair and protect new or existing balconies while providing an aesthetic finish to compliment any architectural design.

FLOOR COVERING INSTALLATION

SIKA PLAYS A CRITICAL ROLE IN THE FINAL APPEARANCE AND SERVICE LIFE OF YOUR FLOORING INSTALLATION SYSTEM. Sika® is active in wood floor bonding, tile setting materials, resilient flooring adhesives, and subfloor surface preparation. Our core technologies include cement, epoxy, urethane, hybrid polymers, acrylic, and water-based chemistries.

With the recent addition of Schönox® to the Sika® USA portfolio, Sika® has become a market leader in producing subfloor surface preparation materials and one of the preeminent single-source providers of Sika® Secure full-system flooring installation solutions for residential and commercial projects. As a world-renowned leader in several market segments, Sika® offers an extensive range of flooring installation products and building materials to meet the requirements of professional contractors and installers.

These product categories include cementitious and synthetic-based subfloor prep. materials, primers for porous and non-porous substrates, sound and moisture control systems, waterproofing solutions, cementitious thin sets, tile grouts, anti-fracture membranes, and much more. Sika® offers professionals and end-users trusted products and expertise across a full line of innovative installation solutions for wood, resilient, tile, stone, and many other types of finished floors.

RESINOUS FLOORING

SIKA HAS THE FLOOR SOLUTIONS THAT WILL MEET THE DURABILITY, AESTHETIC AND ERGONOMIC REQUIREMENTS OF YOUR PROJECTS. Sika flooring solutions are engineered to address the special challenges that each project brings including rapid return to service, environmental safety and low total cost of ownership. Sika's robust floor systems resist abuse from impacts, chemical attack and mechanical wear that protect the underlying slab and increase its lifecycle performance. The design aspects of these systems are limitless with color, texture, aggregate and finish sheen options to match any aesthetic preference. When used in conjunction with our flooring,

Sika's high performance wall systems provide hygienic, envelope-like protection for the entire room. Sika floor and wall systems are seamless and monolithic eliminating cracks and crevasses that become harborage points for dirt and contaminants, greatly reducing cleaning and maintenance costs and efforts.

WALL COVERING ADHESIVES & COATINGS

SIKA OFFERS WALL COVERING ADHESIVE & COATING SYSTEMS MEET APPLICATION REQUIREMENT OF NEW CONSTRUCTION OR RENOVATION PROJECTS. Sika® is a market leader in developing wall covering systems engineered with premium-grade water-based and acrylic adhesive and primer technologies that assist in providing problem-solving capabilities while adding an aesthetic beauty to any residential or commercial project. These high-performance wall systems provide hygienic, envelope-like protection for the entire room. Sika® wall systems are seamless and monolithic, eliminating cracks and crevasses that become harborage points for dirt and contaminants, greatly reducing cleaning and maintenance costs and efforts.

Sika® wall covering systems span a wide range of uses and benefits to meet the needs of any new or renovation-based project with an emphasis on energy efficiency, design versatility, and easy maintenance. Sika® is a leader in providing Sika® Secure full-system installations solutions from a single-source producer.

ROOFING

THE ROOFING SYSTEM PLAYS AN ESSENTIAL ROLE IN THE PROTECTION OF A BUILDING. Ultraviolet rays, extreme weather, and ponding water all conspire to compromise the system prematurely, leading to leaking, damage to the building, costly repairs, and possibly an early tear-off and re-roof.

Sika responds to these challenges by offering a variety of roofing technology options from single-ply PVC, modified bitumen, hot rubberized asphalt or liquid-applied resin membranes. Our products, systems, and services are designed to meet the needs of any building owner all over the world. With 60+ years of experience and a reputation for making buildings and structures watertight in every imaginable climate, you are not only choosing a system that can withstand extreme elements but one that will be able to provide superior protection for decades.

WATERPROOFING

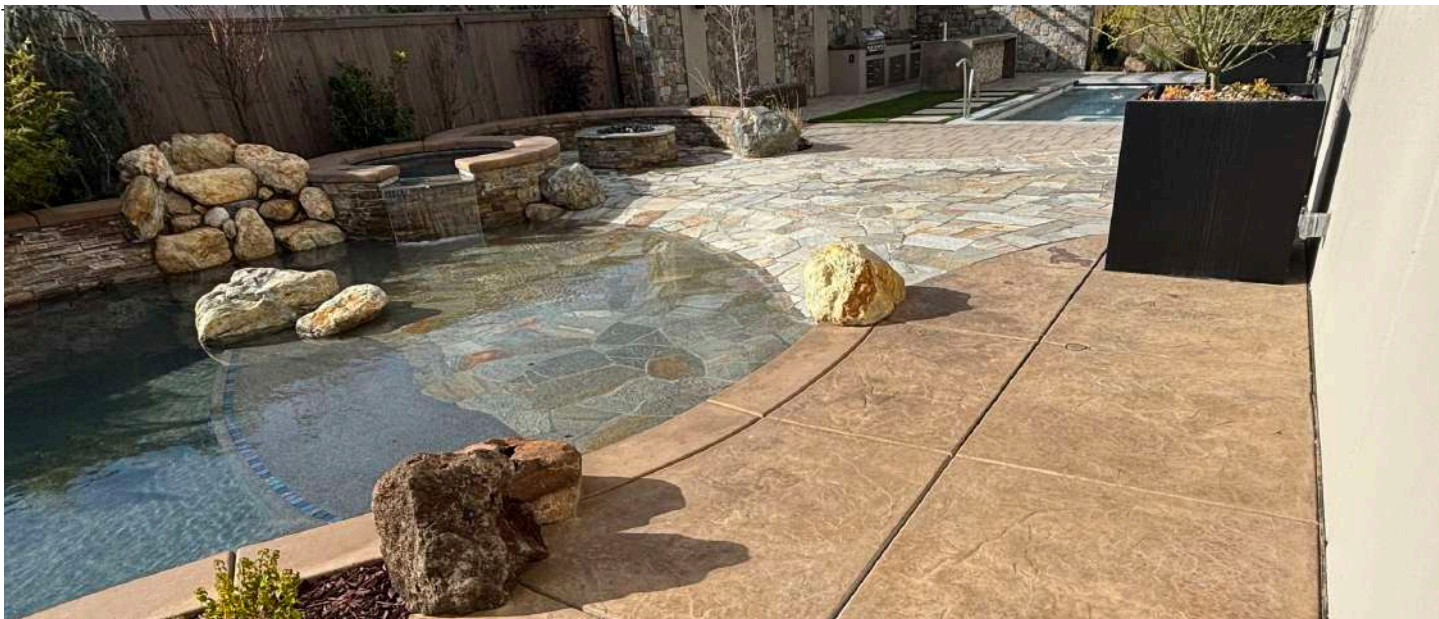

SIMILAR TO A ROOFING SYSTEM, WATERPROOFING SYSTEMS PROTECT A BUILDING AND/OR STRUCTURE FROM THE ELEMENTS. Whether waterproofing an amenity deck, terrace, pool, or planter, ultraviolet rays, ponding water, root infiltration, high alkaline, etc. all conspire to compromise the system prematurely, leading to leaking, damage to the building and/or substrate, costly repairs, and possibly an early replacement.

Sika responds to these challenges by offering a variety of hot and cold liquid-applied membranes such as polyurethane, hot-rubberized asphalt, silicone, acrylic, polyaspartic and polyurea. With 60+ years of experience in liquid membranes and a reputation for making buildings and structures watertight in every imaginable environment, you are not only choosing a system that can withstand the elements but one that will be able to provide superior protection for decades. Additionally, Sika offers concrete admixtures that protect the concrete from within.

DECORATIVE CONCRETE

CHANGING HOW THE WORLD LOOKS AT CONCRETE. Sika offers a complete range of engineered decorative concrete coloring, texturing, refurbishment and performance systems that bridge the gap between functionality and aesthetics, allowing architects, specifiers, contractors and homeowners to achieve both performance goals and design intent. With LEED-compliant, solar-reflective concrete admixtures, Sika's decorative concrete helps mitigate the urban heat island effect, offering a sustainable solution that enhances outdoor spaces while supporting environmental goals.

From interior flooring to exterior hardscapes, nothing quite compares to the versatility and reliability of colored and stamped concrete. Sika has spent decades developing and perfecting the coloring and tools used in stamped concrete, resulting in our exclusive line of decorative concrete products. We're changing the way the world looks at concrete.

SEALANTS & ADHESIVES

SIKA'S EXPANSIVE PORTFOLIO OF SEALANTS AND ADHESIVES OFFER A COMBINATION OF TESTED PRODUCTS WITH DECADES ON THE MARKET AND NEW, INNOVATIVE PRODUCTS HELPING TO MOVE THE INDUSTRY FORWARD. With numerous polyurethane, silicone and hybrid sealants offerings available, specific adhesion, dirt resistance, substrate adhesion, protection requirements can be tailored to your specific project needs. Multipurpose adhesives and anchoring adhesives are also available for a wide range of project applications. Sika's high-performance adhesives and sealants not only improve air tightness and energy efficiency but also help reduce strain on HVAC systems. With increasing skilled labor shortage and shrinking working seasons, installers and contractors must make every minute count. Sika chemists have taken this into account by developing high-performance sealants and adhesives that can be applied to green concrete and in arctic conditions quickly and easily.

REPAIR & PROTECTION

SIKA HAS OVER A 100 YEAR LEGACY OF REPAIR AND PROTECTION OF DECAYING AND DAMAGED BUILDINGS.

Innovative products, with a focus on speed and simplicity of application, high performance and unparalleled product support sets Sika apart as a market leader in the field of concrete maintenance and refurbishment. Extending the life of existing structures is one of the most effective ways to build sustainably, and Sika's high-performance repair and protection systems help preserve the built environment. Sika offers superior concrete corrosion mitigation solutions by addressing the root cause of deterioration within the structure using anodes and rebar coatings as well as protecting from the surface using sealers and coatings for increased longevity. Building owners can greatly extend structure service life through a proactive and regular maintenance program combined with Sika's high performance repair and protection product lines.

INFRASTRUCTURE

SIKA'S PROJECT SOLUTIONS TO MEET THE CHALLENGES OF INFRASTRUCTURE CONSTRUCTION PROJECTS.

Sika provides full support to department of transportation, municipalities, engineers, and contractors with necessary technical advice and assistance to ensure a successful project. With the most comprehensive Infrastructure portfolio in the industry, Sika rises to the challenge of any project, whether it be new construction, preservation, or maintenance. Our teams are experts in all fields of Infrastructure – Bridge and Highway, Transit, Airport Runways, Fresh and Waste Water Treatment, Tunnels, Piers and Wharves, etc.

EQUIPMENT GROUTING & PIPELINE PROTECTION

WHEN KEY STAKEHOLDERS IN THE ENERGY AND HEAVY INDUSTRY SECTORS DEMAND PEAK INFRASTRUCTURE PERFORMANCE, THEY TURN TO THE EXPERTISE OF SIKA'S POWER & INDUSTRIAL / OIL & GAS BUSINESS. We specialize in high-performance solutions—including repair materials, grouts, and protective rockshields—designed for the extreme conditions found in power generation, petrochemical processing, pipeline protection, and other heavy industrial applications. Our high-performance grouts deliver superior load transfer, vibration resistance, and long-term stability in the most demanding environments. Meanwhile, our rockshields continually protect thousands of miles of buried pipeline from the harsh effects of rocky backfill. Trusted by owners, engineers, and specifiers, Sika products are the top choice for significant projects that can tolerate nothing less than success.

PRODUCTS	PRODUCT FAMILIES
Anchoring Adhesives	Sika® AnchorFix
Concrete Repair Solutions	SikaEmaco®
Pipeline Rockshield	Sika® Tuff-N-Nuff
Precision Epoxy Grouts	SikaFlow®
Precision Cementitious Grouts	SikaGrout®

JOINT WATERPROOFING

AS AN INDUSTRY PIONEER AND ONE OF THE FIRST MANUFACTURERS OF POLYVINYL CHLORIDE (PVC) WATERSTOPS, SIKA® GREENSTREAK® DELIVERS THE HIGHEST-QUALITY AND MOST SPECIFIED WATERSTOP BRAND ON THE MARKET. Concrete structures are only as watertight as the waterstops that join them. Structures such as water treatment plants, reservoirs, locks, dams, and below-grade facilities rely on waterstop systems to waterproof their joints. When selecting a waterstop, several factors must be considered—including joint type, joint movement, hydrostatic pressure and chemical exposure. Sika offers the industry’s most comprehensive line of waterstops, providing solutions to meet the most demanding project requirements.

PRODUCTS	PRODUCT FAMILIES
Chemically Resistant Waterstop	Sika® Westec®
Expansion Joints	Emseal®, Sikadur-Combiflex®
Injectable Waterstop	Sika® Fuko®
Non-Swelling Gasket Waterstop	Sika® Lockstop®
PVC Waterstop	Sika® Greenstreak®
Strip Applied Hydrophilic Waterstop	Sika® Hydrotite®, Sikaswell®, Sika® Lockstop®
Tie Hole Seal	X-Plug®
Waterproofing Injections	Sika® Inject®

3D CONCRETE PRINTING

SIKA OFFERS COMPREHENSIVE SIKACRETE® 3D SOLUTIONS FOR PRINTING CONCRETE RAPIDLY, PRECISELY, AND INEXPENSIVELY ACCORDING TO THE PROJECT REQUIREMENTS. Sika's over-100-year history in cement and admixture technology places us right in the middle - we want to support you with your printing requirements. Through our expert knowledge of construction materials, solutions, and with a global footprint in over 100 countries, Sika can support you with starting or improving your 3D concrete printing business.

Sika has developed a multi-component system for 3D concrete printing including material supply, mixing technology, print head, gantry system, and software control. Furthermore, Sika develops a one-component material for customers already using a 3D printing system. This needs a close collaboration between the customer and Sika in order to supply the right material for the printing solution. With this system approach a material can be developed which leads to prints with the highest possible quality and accurate set times.

PRODUCTS	PRODUCT FAMILIES
1K Housing Material	SikaCrete®-733 W
1K Cold Weather Material	SikaCrete®-752 F
1K & 2K Printing Material	SikaCrete®-752
2K Liquid Accelerant	Sika® Sigunit® L-5601
3K Printing System	SikaCrete®-7000
Liquid Colorant	Colorbiotics® CB3D

SUSTAINABILITY

SIKA CORPORATION HAS LONG UNDERSTOOD THE IMPORTANCE OF DELIVERING QUALITY, HIGH-PERFORMANCE, AND SUSTAINABLE MATERIALS to its customers. Sika actively strives to offer product solutions that enable sustainable construction practices.

SUSTAINABLE PRODUCT CERTIFICATIONS

Sika Corporation provides a comprehensive range of third-party verified sustainability certifications and ecolabels that contribute to credits under leading Green Building Standards and Certification systems, including LEED, WELL, Green Globes, and the Living Building Challenge.

Our Environmental Product Declarations (EPDs), Health Product Declarations (HPDs), and VOC emissions testing certificates are available at usa.sika.com/sustainability. For the latest LEED information, you can easily search by product name or CSI division at leed.sika.com to instantly download documentation outlining each product's LEED credit contributions.

SUSTAINABILITY PORTFOLIO MANAGEMENT (SPM)

Sika has developed a robust Sustainability Portfolio Management (SPM) system that provides a transparent, factual, and reliable assessment of its product portfolio.

By applying the SPM methodology, Sika is able to assess its products against a consistent set of criteria, with the goal of demonstrating proven sustainability and performance.

TRAINING, EDUCATION & SUPPORT

FOR MORE THAN 100 YEARS, ARCHITECTS, CONSTRUCTION COMPANIES, AND MANUFACTURERS HAVE TRUSTED SIKA PRODUCTS TO SEAL, BOND, DAMPEN, REINFORCE, AND PROTECT THE THINGS THEY DESIGN AND BUILD.

Beyond simply providing specialty products, Sika is a true partner, bringing its deep application and technical expertise to projects, while addressing customer needs for better, smarter, and more sustainable solutions.

TRAINING

Sika is a proven and reliable partner to the whole building and construction industry. Worldwide we provide our customers far more than high performance construction products. We also assist and add value for our customers, by providing many more support services for our products and their installation. Sika offers technical and application training courses for contractors to educate them on the various Sika product systems and application methods.

EDUCATION

To move the industry forward and promote best practices, Sika's team offers regularly scheduled webinars, industry support, literature and Lunch & Learns upon request. We are proud to be a registered provider with the American Institute of Architects continuing education system nationally and are involved in local industry groups and associations throughout the country.

SUPPORT

Sika Building Solutions is made possible by our team of experts. When choosing Sika, we have expert representatives standing by to assist in selection, procurement, installation and trouble shooting. Sika is a reliable partner in all building solution needs.
