

SIKATACK® ELITE

THE NEXT GENERATION AUTO GLASS REPLACEMENT ADHESIVE

SikaTack® ELITE is a polyurethane based accelerated adhesive system, specially designed for the Auto Glass Replacement (AGR) industry. SikaTack® ELITE utilizes Sika's innovative PowerCure technology to cure rapidly from inside the bead, achieving Minimum Drive Away Time (MDAT) in 30 minutes and reinforces car bodies to the level of a new vehicle within just one hour.

PRODUCT BENEFITS

- 30 minute MDAT in all conditions
- Cured to OEM Level within 60 minutes
- Enables fast, precise ADAS recalibration
- Excellent application properties
- Meets all OEM strength requirements
- Crash test proven - Meets FMVSS 212

POWERCURE DISPENSER

THE HIGHEST PRECISION, IN YOUR HANDS

The PowerCure adhesive dispensing system delivers the precision and performance of the high-end pump systems found on OEM production lines. It combines high flexibility, ergonomic and easy handling, and minimal waste in a clear and focused design. The use of a single, brushless motor mechanically couples extrusion, dosing and dynamic mixing, and allows users to control extrusion speed on the go without compromise. Providing the fastest curing and safest adhesive at an unmatched comfort level for the user, PowerCure is the ultimate adhesive dispensing solution for Auto Glass Replacement technicians.

EFFICIENT PACKAGING

PowerCure packaging is based on the unipack, the most efficient packaging solution for windshield adhesives. The packaging is designed to minimize waste and to allow ease in loading and replacement.

DYNAMIC MIXING

The mixer is designed to fit an ordinary application nozzle. The specially shaped v-cut supports the application of the adhesive at a convenient angle to the glass and cuts the material consumption by up to 8%.
