YOU'RE INVITED !

A SIKA DAY OF LEARNING

Sika hosts unique events that bring together the design, construction, and owner communities to network and explore the trends and innovations that are defining our industry and shaping our cities.

BUILDING TRUST

A SIKA DAY OF LEARNING

WHERE: LOWRY COMPANY DISTRIBUTION CENTER
23030 KIDDER STREET HAYWARD, CA 6454
(510) 785 2404

DATE: TUESDAY, MARCH 19TH, 2019
TIME: 9:00 AM-12:00 PM

Sikalastic® RoofPRO

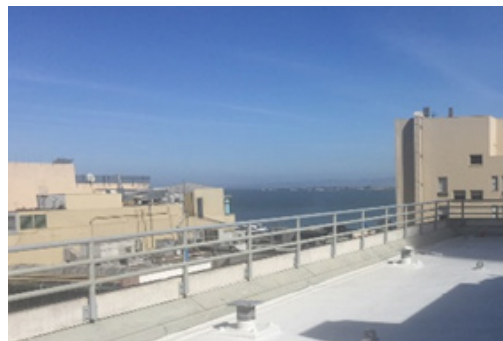

Fluid Applied Systems for Roofing and Waterproofing are one of the fastest growing segments of the building envelope industry. They offer an option for both the new construction as well as retrofit applications supplying a fully adhered, conformable, and often cost effective solution verses re-roofing. Cold applied systems in particular offer safety, efficiency and convenience with advanced long wearing polymer technologies. In retrofit applications, they also minimize waste destined for over-taxed landfills.

- If there was a liquid applied, fully reinforced system that could be used as a new roof, reroof, below grade waterproofing and deck coating option over nearly every construction substrate, **would you consider it?**
- If that product was a single component (no mixing) and the remainder could be stored for months afterward and still remain usable, **would you try it?**
- If that product offered applicator certification performance warranty programs at no additional charge and was compatible with numerous accessories including sealants, mortars, epoxies, **would you use it?**

Please join us at the Lowry Company distribution center in Hayward, CA for a hands on demonstration / training program the Sikalastic Roofpro System conducted with Sika's National Technical Manager Mr. David Axt. This is a 30 year globally proven system that can help you do more work, more profitably and with fewer call backs. Projects including the 200,000 SF re-roof of the Marin County Civic Center in San Rafael have seen the value of the system and we are sure you will too.

Refreshments will be provided in the morning along with a full lunch. A prize raffle will also take place at the close of the program as well.

Please RSVP at your earliest convenience to Eric Nelson of Lowrys at 510 329 5940 or Scott Tyson with Sika at 650 291 9651
