SIKA FULL RANGE SOLUTIONS FOR CONSTRUCTION:

WATERPROOFING

REFURBISHMENT

SEALING AND BONDING

ROOFING

FOR MORE INFORMATION:

FLOORING

All sales of Sika products are subject to Sika's current Terms and Conditions of Sale available at www.sikausa.com or by calling 201-933-8800. Prior to each use of any Sika product, the user must always read and follow the warnings and instructions on the product's most current Product Data Sheet, product label and Material Safety Data Sheet, which are available at www.sikausa.com or by calling Technical Services at 1-800-933-7452. Nothing contained in any Sika materials relieves the user of the obligation to read and follow the warnings and instructions for each Sika product as set forth in the current Product Data Sheet, product label and Material Safety Data Sheet prior to product use.

The sale of all Sika products are subject to the following Limited Warranty:

LIMITED MATERIAL WARRANTY

SIKA warrants this product for one year from date of installation to be free from manufacturing defects and to meet the technical properties on the current Product Data Sheet if used as directed within shelf life. User determines suitability of product for intended use and assumes all risks. Buyer's sole remedy shall be limited to the purchase price or replacement of product exclusive of labor or cost of labor.

NO OTHER WARRANTIES EXPRESS OR IMPLIED SHALL APPLY INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. SIKA SHALL NOT BE LIABLE UNDER ANY LEGAL THEORY FOR SPECIAL OR CONSEQUENTIAL DAMAGES. SIKA SHALL NOT BE RESPONSIBLE FOR THE USE OF THIS PRODUCT IN A MANNER TO INFRINGE ON ANY PATENT OR ANY OTHER INTELLECTUAL PROPERTY RIGHTS HELD BY OTHERS.

Our most current General Sales Conditions shall apply. Please consult the Product Data Sheets prior to any use and processing.

CONCRETE MANUFACTURED CONCRETE

PRODUCTS

SikaMix[®] TECHNOLOGY

BUILDING TRUST

SikaMix[®] CAN GIVE YOU THE COMPETITIVE EDGE

SikaMix[®] TECHNOLOGY

Improves all major aspects of manufactured concrete products.

SINCE 1910, SIKA has been supplying innovative products to the construction industry. Even our first product, appropriately named Sika[®] 1, addressed one of the fundamental needs of the drycast industry, improving the water repellency and lowering the absorption of concrete products. Since then, Sika has continued to focus, improve and develop products to meet the specific requirements of this industry segment, such as fast, efficient compaction, improved surface finish, and the reliable achievement of applicable quality standards. We provide our technology and experience to improve your production process and reduce your costs.

SikaMix[®] PRODUCTS IMPROVE THE:

- Homogeneous filling of molds, even into narrow shapes
- Cement dispersion and efficiency allowing possible reduction
- Compactibility of drycast concrete products
- Dispersion of pigment for improved color vibrancy
- Early strengths for reducing time to secondary processing
- Average ultimate strengths and their overall variation
- Uniform surface texture and product shape
- Water repellent characteristics of concrete products
- Resistant to both primary & secondary efflorescence
- Necessity for repairs, patching and cull rate

In summary, this means fewer claims and the production of more cost effective, quality products. Start taking advantage of this unique technology today!

The high sensitivity of drycast concrete to variations in raw materials and production demands can disrupt the quality of these products. This often leads to mix/product over-design, a high number of culls, and/or efflorescence, resulting in customer claims.

The SikaMix range of products provides cost-effective and economic solutions for consistent production of manufactured concrete products with uniform finish, improved durability and reduced tendency to efflorescence.

PROCESS AND MIX OPTIMIZATION

FREEZE/THAW DURABILITY

Improved performance creates reliability.

STRENGTH/VARIATION

Reduced variation and increased strength leads to more consistent quality and enables a reduction in cementitious content

EXCELLENT COMPACTIBILITY

Improved compaction leads to improved durability, better strengths, less efflorescence and an overall reduction in claims.

BUSINESS IMPROVEMENT

SMOOTH FINISH

Especially in pipe production, a smooth, tight surface finish reduces costly patching and repairs.

PERFORMANCE

 Reduced permeability, increased durability, and improved early & final strengths

PRODUCTIVITY

 Optimized mix designs, lower cull rates, reduced curing temperatures

WATER REPELLENCY

 Reduced absorptions and exceptional wind driven rain performance aid in the production of "water repellent" products

EFFLORESCENCE CONTROL

 Dramatically reduce both primary and secondary efflorescence

APPEARANCE

Brighter colors, increased uniformity, sharper corners and edges

IMPROVED MATERIAL FLOW Consistent, homogeneous filling of molds helps avoid defects.

FASTER PRODUCTION

Improved production efficiency provides increased output and allows production on demand.
