FINISHES SELECTION GUIDE

INVITING TEXTURES, INSPIRING COLORS

BUILDING TRUST

LAHABRA PEBBLETEX FINISHES

COLOR, TEXTURE & PROTECTION

CREATE THE LOOK AND FEEL YOU WANT WITH A MYRIAD OF TEXTURES AND COLORS FOR LASTING IMPRESSIONS. LaHabra advanced decorative and protective finishes offer the performance that traditional cement-based finishes and paints never could. Performance that protects your home or building through rain and sleet, baking hot sun or the dampness of high humidity. And keeps it looking great for years to come.

CHOOSE A FINISH

PEBBLETEx FINISHES

A 100% acrylic polymer-based finish with high solids formulation, Pebbletex offers long-term durability and weather resistance. Used over cement-based surfaces, Pebbletex is flexible enough to seal existing, non-moving hairline cracks, thereby providing protection against degradation caused by moisture and pollution intrusion. With a harder surface than elastomeric finishes, Pebbletex offers excellent abrasion and dirt pick-up resistance.

LIMESTONE

Factory-mixed, 100% acrylic polymer finish coat. Available in LaHabra's standard colors and custom colors. Limestone Finish utilizes uniformly-sized aggregates for a uniform, fine texture.

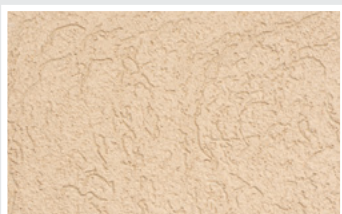

MOJAVE

Factory-mixed, 100% acrylic polymer finish coat. Available in LaHabra's standard colors and custom colors. Mojave Finish provides a uniform, "pebble" appearance.

FINETEX

Factory-mixed, 100% acrylic polymer finish coat. Available in LaHabra's standard colors and custom colors. Finetex Finish can achieve a wide variety of free-formed, textured appearances, including stipple and skip-trowel. Note: If a "smooth" application is required, multiple coats and skillful application techniques will be required.

NATURAL SWIRL

Factory-mixed, 100% acrylic polymer finish coat. Available in LaHabra's standard colors and custom colors. Natural Swirl Finish has a medium "worm-holed" appearance which is achieved by the random aggregate sizes in the Finish. The "worm-holed" look can be circular, random, vertical or horizontal.

COLOR & TEXTURE The very first impression of a building is almost always made by its color. That's why our color palette presents so many choices for distinctive style and design, limited only by the imagination. All Pebbletex decorative and protective finishes are available in 64 standard colors as well as unlimited custom tinting.

Bridges hairline cracks smaller than 1/32"				■	

LAHABRA SPECIALTY FINISHES

100% ACRYLIC POLYMER FINISHES WITH ADVANCED TECHNOLOGY to improve long-term performance and dirt pick-up resistance on exterior and interior walls. Use to create unique stone-like, metallic or mottled stucco appearance to complement a building's design.

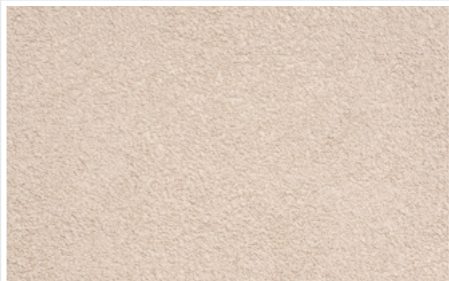

LAHABRA TERSUS FINISH

Tersus Finish is a line of modified acrylic textured finishes designed to provide excellent water repellency and enhanced resistance to environmental soiling. When rainwater contacts the surface, it beads and carries away dirt, soil and debris in its pathway. The built in anti-soiling properties of the finishes resist dirt and staining, reducing maintenance costs and extending a building's aesthetic appeal.

SIKAWALL®-6260 METALLIC FINISH

Create durable, lightweight metallic panels with SikaWall®-6260 Metallic Finish. Factory-mixed, 100% acrylic polymer finish coat. Metallic Finish has a pearlescent appearance. It utilizes uniformly-sized aggregates for a uniform fine texture. Available in a variety of colors.

SIKAWALL®-6200 MAXLASTIC FINISH

An acrylic-based elastomeric finish that is flexible and weatherproof, specifically designed to protect cement-based substrates with hairline cracks (smaller than 1/32") that may expand and contract due to extreme temperature changes. Maxlastic Finish literally bridges the crack as it widens and returns to its original shape as the crack contracts.

SIKAWALL®-4040 ENCAUSTO VERONA

Achieve an old-world charm with SikaWall-4040 Encausto Verona Finish. The factory-mixed, 100% acrylic polymer finish coat utilizes uniformly-sized aggregate to create a free-formed, flat texture, while a mottled look (as shown) can be achieved by combining multiple colors.

SIKAWALL®-4020 GRANITE & STONE FINISH

SikaWall-4020 Granite & Stone Finish provides a classic granite or marble-like textured finish appearance. The factory-mixed, reflective stone finish consists of colored aggregate and large black mica flakes in a 100% acrylic transparent binder.

FINEBRICK

The look of brick can be achieved by using brick finish techniques that utilize special templates and LaHabra Acrylic Finishes. Finebrick surfaces yield the appearance of a wide variety of brick veneers over any LaHabra wall system or other approved substrates.

SIKAWALL®-4900 ANTIQUING GLAZE CS

SikaWall-4900 Antiquing Glaze CS produces beautiful aesthetics with varied degrees of mottling, coloration and glaze. The convenient stain or glaze product consists of a 100% acrylic polymer clear base that is distributor tinted.

WOOD GRAIN EFFECT

Create the warm, inviting look of wood panels LaHabra Wood Grain Effect. The finish technique is created with LaHabra Finetex Texture Finish – Wood Grain Effect Neutral Gray and two SikaWall-4080 Color Advance Coating finishes.

SIKAWALL®-6230 CHROMA FINISH

Vibrant and bold, high performance colorants integrated into 100% acrylic polymer finishes formulated with advanced technology for superior fade resistance, improved long-term performance and dirt pick-up resistance.

ULTRA SMOOTH FINISH

Ultra Smooth Finish creates an aesthetically pleasing surface color and ultra smooth texture. The 100% acrylic polymer finish coat utilizes a uniformly-sized particle distribution.

PACKAGING

Pebbletex, Specialty, Pebbletex Tersus and Chroma
Finishes 5 gallon pail (19 liter pail)

COVERAGES

Coverage rates may vary depending on the coating texture, porosity of substrate and application techniques. Consult the individual product bulletins for coverage rates, uses, application instructions and limitations.
