

SIKA AT WORK

Siesta Key Beach House, Siesta Key, FL

LIQUID APPLIED ROOFING & WATERPROOFING
Sikalastic® Clearglaze

BUILDING TRUST

PROJECT DESCRIPTION

After a building envelope inspection, the contractor observed some deterioration of the glass block system. The contractor contacted the local Coastal Construction Products product expert team for recommendations on products that could be used to seal the whole assembly without changing the curb appeal or architecture of the home. Sika's Sikalastic Clearglaze was proposed to use as a sealer for the entire assembly. Sika assisted with project examples and application recommendations, which solidified the project scope.

PROJECT SOLUTIONS

Sikalastic Clearglaze sealed the glass block face and mortar joints with the same product, without changing the appearance of the building's façade. The result is a monolithic, uniform appearance that resists water intrusion.

PRODUCTS USED

- Sikalastic Clearglaze

PROJECT PARTICIPANTS

- Engineer: Coastal Construction Products
- General Contractor: Howell Construction Group
