

TECHNICAL BULLETIN

SikaWall®-3000 Rapid Bond Adhesive

SikaWall®-3000 Rapid Bond adhesive is a one component fast curing urethane adhesive that has been tested for use as an alternative product to Parex 121 Adhesive Basecoats used to attached EPS or GPS insulation boards in the following Parex EIFS assemblies.

- Parex Standard PB
- Parex Standard Extra PB
- Parex WaterMaster Ci
- Parex WaterMaster GPS

Refer to SikaWall®-3000 Rapid Bond Product Data Sheet and SikaWall®-3000 Rapid Bond Installation Guide for application instructions, storage, and application temperature limits. SikaWall®-3000 Rapid Bond Adhesive should be applied as the per above drawings so that ribbons run vertically to allow for drainage. Insulation boards at system terminations must be pre-backwapped with mesh and base coat that has dried before application of SikaWall®-3000 Rapid Bond.

NOTE: SikaWall® -3000 Rapid Bond should not be used in any Parex MVS-CI, Parex WaterMaster XPS or Parex WaterMaster NC assemblies, or Soffit Applications.
