

SIKA AT WORK

Stonebridge Homes, Orlando, Florida
Second Floor Terrace Waterproofing

LIQUID APPLIED ROOFING & WATERPROOFING
Sikalastic® RoofPro 20 - 624WP

BUILDING TRUST

PROJECT DESCRIPTION

Josh Hughes Restoration and Coastal Construction Products were asked about a product that could waterproof the unique terrace decks, conform to the gutter trench drains and be buried under tile. RoofPro was offered as the long term solution. JHR proposed RoofPro as the only option that could conform to the unique drainage system of the deck.

PROJECT SOLUTIONS

RoofPro provided an under tile waterproofing solution with ability to conform to the gutter/trench drain system of the deck. The waterproofing solution was utilized to stop leaks and conform to gutters. The customer will now solely choose to use RoofPro on all custom homes.

PRODUCTS USED

- Sikalastic®-624 WP
